K2 is almost 800ft shorter than Everest, yet it's a far harder climb. Many great mountaineers became obsessed with reaching its summit, not all of them lived to tell of their adventures. Capturing the depth of their obsession, the heart-stopping tension of the climb and delving into the controversy that still surrounds the first ascent, Mick Conefrey delivers the definitive account of the 'Savage Mountain'. From drug-addicted occultist Aleister Crowley to the brilliant but tortured expedition leader Charlie Houston and, later, the Italian duo who finally made it to the top, Conefrey resurrects the tragic heroes, eccentric dreamers and uncompromising rivalries forever instilled in K2's legacy. This is the riveting, groundbreaking story of the world's deadliest mountain. The most trustworthy source of information available today on savings and investments, taxes, money management, home ownership and many other personal finance topics.

- Chronicles the first all-African American summit attempt on Denali, the highest point in North America
- Part adventure story, part history, and part argument for the importance of inspiring future generations to value nature

The nation's wild places—from national and state parks to national forests, preserves, and wilderness areas—belong to all Americans. But not all of us use these resources equally. Minority populations are much less likely to seek recreation, adventure, and solace in our wilderness spaces. It's a difference that African American author James Mills addresses in his new book, *The Adventure Gap: Changing the Face of the Outdoors*. Bridging the so-called "adventure gap" requires role models who can inspire the uninitiated to experience and enjoy wild places. Once new visitors are there, a love affair often follows. This is important because as our country grows increasingly multicultural, our natural legacy will need the devotion of people of all races and ethnicities to steward its care. In 2013, the first all-African American team of climbers, sponsored by the National Outdoor Leadership School (NOLS), challenged themselves on North America's highest point, the dangerous and forbidding Denali, in Alaska. Mills uses Expedition Denali and its team members' adventures as a jumping-off point to explore how minority populations view their place in wild environments and to share the stories of those who have already achieved significant accomplishments in outdoor adventures—from Mathew Henson, a Black explorer who stood with Peary at the North Pole, to Kai Lightner, a teenage sport climber currently winning national competitions. The goal of the expedition, and now the book, is to inspire minority communities to look outdoors for experiences that will enrich their lives, and to encourage them toward greater environmental stewardship. Marketing visionary Martin Lindstrom has been on the front line of the branding for over twenty years. In Brandwashed, he turns the spotlight on his own industry, drawing on all he has witnessed behind closed doors, exposing for the first time the full extent of the psychological tricks and traps that companies devise to win our hard-earned money. Lindstrom reveals eye opening details such as how advertisers and marketers target children at an alarmingly young age (starting when they are still in the womb), what heterosexual men really think about when they see sexually provocative advertising, how marketers and retailers stoke the flames of public panic and capitalize on paranoia over diseases, extreme weather events, and food contamination scares. It also presents the first ever evidence to prove how addicted we are to our smartphones, and how certain companies (like the maker of a very popular lip balm), purposely adjust their formulas in order to make their products chemically addictive, and much, much more. Brandwashed is a shocking insider's look at how today's global giants conspire to obscure the truth and manipulate our minds, all in service of persuading us to buy. Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region, bringing together Orange County's most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design. He began his illustrious mountaineering career as a teenager in the Pacific Northwest, climbing insatiably with his twin brother, Jim. He earned coveted spots on expeditions to formidable peaks in Alaska, the Himalaya, and the Karakoram, and went on to lead the expedition that made the first American ascent of the North Col on Everest in 1984. To Northwesterners, Lou's name is synonymous with Mount Rainier, where he has guided thousands to its summit since his own first ascent of the mountain at age 19. In Lou Whittaker: Memoirs of a Mountain Guide, Lou is at his storytelling best as he shares adventures and wisdom honed from the wild times of his youth to his more recent climbs with some of the country's best mountaineers. Tales of life as a young

mountain rescuer, and later as mentor to others, are filled with his trademark humor, boundless energy, and compassion. He weaves his simple and practical philosophy through memories of climbing with Jim Wickwire, Pete Schoening, John Roskelley, Joe Kennedy, Jr., and a host of other celebrities and VIPs. He recounts amazing episodes on Mount McKinley, K2, Everest, Kangchenjunga, and his beloved Mount Rainier. Evident and inspiring throughout are his love for climbing and for life -- even amidst the loss of friends and promising young proteges. When it comes down to dying, Lou says, "I want to know what it is like to have really lived." In 2010, Buz Randall was working to preserve the photographs that he originally took during the 1961 Seattle Mountaineers Summer Expedition to Mount Robson. As Buz reorganized his color slides and made new electronic copies of images that were nearly 50 years old, he reminisced about his father, Al Randall, the interesting people who took part in the expedition, and the difficult climb that they were able to complete. In conjunction with more than forty color photographs, this book is a record of these important recollections and an exciting piece of mountaineering history associated with Mount Robson. SUVs have taken over America's roads. Ad campaigns promote them as safer and "greener" than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In *High and Mighty*, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect--for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of *Unsafe at Any Speed* and *Fast Food Nation*, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not. *Backpacker* brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, *Backpacker* is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. *Backpacker's* Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured. Details the author and his partner Willi Unsoeld's ascent of Everest's West Ridge in 1963. *FIELD & STREAM*, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations. When eleven climbers died on K2 on August 1, 2008, it was a stark reminder that the world's second-highest mountain has, for more than a century, been regarded as the most difficult and dangerous of all—for every four people who reach the top, one dies in the attempt. *K2, The Savage Mountain* tells the dramatic story of the 1953 American expedition, led by Charles S. Houston, when a combination of terrible storms and illness stopped the team short of the 28,251-foot summit. Then on the descent, tragedy struck, and how the climbers made it back to safety is renowned in the annals of climbing. *K2, The Savage Mountain* captures this sensational tale with an unmatched power that has earned this book its place as one of the classics of mountaineering literature. **NATIONAL BESTSELLER** • This gripping and triumphant memoir from the author of *The Mountain* follows a living legend of extreme mountaineering as he makes his assault on history, one 8,000-meter summit at a time. "From the drama of the peaks, to the struggle of making a living as a professional climber, to the basic how-tos of life at 26,000 feet, *No Shortcuts to the Top* is fascinating reading."—Aron Ralston, author of *Between a Rock and a Hard Place* and subject of the film *127 Hours* For eighteen years Ed Viesturs pursued climbing's holy grail: to stand atop the world's fourteen 8,000-meter peaks, without the aid of bottled oxygen. But *No Shortcuts to the Top* is as much about the man who would become the first American to achieve that goal as it is about his stunning quest. As Viesturs recounts the stories of his most harrowing climbs, he reveals a man torn between the flat, safe world he and his loved ones share and the majestic and deadly places where only he can go. A preternaturally cautious climber who once turned back 300 feet from the top of Everest but who would not shrink from a peak (Annapurna) known to claim the life of one climber for every two who reached its summit, Viesturs lives by an unyielding motto, "Reaching the summit is optional. Getting down is mandatory." It is with this philosophy that he vividly describes fatal

errors in judgment made by his fellow climbers as well as a few of his own close calls and gallant rescues. And, for the first time, he details his own pivotal and heroic role in the 1996 Everest disaster made famous in Jon Krakauer's *Into Thin Air*. In addition to the raw excitement of Viesturs's odyssey, *No Shortcuts to the Top* is leavened with many funny moments revealing the camaraderie between climbers. It is more than the first full account of one of the staggering accomplishments of our time; it is a portrait of a brave and devoted family man and his beliefs that shaped this most perilous and magnificent pursuit. Presents a historical survey of the world's tallest mountain, featuring accounts of famous climbs and tragedies, previously unpublished photographs, and scientific findings on the impact of climate change. The first major study to explore the relationship between clothing made for survival in the most inhospitable environments on earth and beyond, and the high fashion it has inspired Today— from haute couture to ready- to- wear— parkas, puffer coats, and backpacks, as well as garments made of neoprene and Mylar are everywhere. But the roots of these ubiquitous items of dress and cutting- edge textiles are rarely acknowledged or understood. Inspired by the so-called "heroic era" of polar navigation (1890– 1922), extreme mountain climbing, deep sea exploration, and journeys to outer space, Expedition explores how garments made for the most inhospitable environments on earth and beyond have inspired more than sixty years of fantastical, otherworldly fashions. Lavishly illustrated, this publication features approximately 150 color photographs. The images include high fashion magazine editorials by Irving Penn, Richard Avedon, and others; museum objects from the permanent collections of The Museum at FIT and the American Museum of Natural History; and unpublished photographs of early expeditions in the archives of the Explorer's Club in New York. In national bestseller *The Mountain*, world-renowned climber and bestselling author Ed Viesturs and cowriter David Roberts paint a vivid portrait of obsession, dedication, and human achievement in a true love letter to the world's highest peak. In *The Mountain*, veteran world-class climber and bestselling author Ed Viesturs—the only American to have climbed all fourteen of the world's 8,000-meter peaks—trains his sights on Mount Everest in richly detailed accounts of expeditions that are by turns personal, harrowing, deadly, and inspiring. The highest mountain on earth, Everest remains the ultimate goal for serious high-altitude climbers. Viesturs has gone on eleven expeditions to Everest, spending more than two years of his life on the mountain and reaching the summit seven times. No climber today is better poised to survey Everest's various ascents—both personal and historic. Viesturs sheds light on the fate of Mallory and Irvine, whose 1924 disappearance just 800 feet from the summit remains one of mountaineering's greatest mysteries, as well as the multiply tragic last days of Rob Hall and Scott Fischer in 1996, the stuff of which *Into Thin Air* was made. Informed by the experience of one who has truly been there, *The Mountain* affords a rare glimpse into that place on earth where Heraclitus's maxim—"Character is destiny"—is proved time and again. We can all be grateful that Whittaker has finally put his extraordinary life on paper. Whittaker's story is a riveting saga of high adventure by one of history's greatest climbers." —Robert F. Kennedy, Jr. * Special anniversary edition to commemorate the 50th anniversary of the first American ascent of Mount Everest * New foreword by Ed Viesturs and a new afterword by the author * More than 100 photos, including several never-before-published images In May of 1963 Seattle mountaineer Jim Whittaker stepped into world history by becoming the first American to summit Mount Everest. Fifty years later, he is still regarded as a seminal figure in North American mountaineering, as well as an astute businessman who helped create the outdoor recreation industry. *A Life on the Edge: Memoirs of Everest and Beyond* is Jim's courageous, no-punches-pulled autobiography and a look at a peripatetic, sometimes difficult life. Beyond the glory of the Everest summit and his other extraordinary climbing feats, including the first American summit of K2, he openly describes his personal, "everyman" experience of social upheaval in the 1960s and 70s, an early divorce, family strife, a passionate new love later in life, near-bankruptcy, and business triumphs and losses. Jim tells it all with verve and honesty and, true to his nature, turns every setback into the stage for new adventure. This special 50th anniversary edition celebrates the story of Jim's life and features a new foreword by Ed Viesturs, as well as a new final chapter that brings readers up-to-date, including details of his trek to Everest Base Camp in

2012 and his son Leif's recent successful summits of Everest. Need more Jim Whittaker? Checkout his interview on New Day Northwest as he talks about Everest, training, and the shocking differences between climbing Everest 50 years ago versus today. What would you do if your family was under attack by a violent Satanic cult? That's the position Jim DiMario is in - but has he found out too late? A successful pastor of a large suburban church, Jim's life unravels when he investigates an animal mutilation that has taken place in his quiet, upscale community. Seemingly by chance, he meets two strangers in his quest for the truth - each of whom have their own reasons to investigate the grisly mutilations. Jim soon finds himself in too deep when problems arise for his friends & family. His world spinning out of control, Jim discovers that he is the focus of a Satanic cult - the shadowy Temple of Anubis, who's true motives are more sinister than mere animal sacrifices. With time ticking away before Samhain, the most unholy night for the occultists, Jim and his allies face a desperate gamble to save his daughter's life from the Satanists who have abducted her. Will he realize too late that his worst enemy is part of his own inner circle? How does a CEO, manager, or entrepreneur begin to sort out what defines and drives a good customer experience and how it can be measured and made actionable? If you know how well the customer experience is satisfying your customers and you know how to increase their satisfaction, you can then increase sales, return visits, recommendations, loyalty, and brand engagement across all channels. More reliable and more useful data leads to better decisions and better results. Innovating Analytics is also about the need for a comprehensive measurement ecosystem to accurately assess and improve the other elements of customer experience. This is a time of great change and great opportunity. The companies that use the right tools and make the right assessments of how to satisfy their customers will have the competitive advantage. Innovating Analytics introduces an index that measures a customer's likelihood to recommend and the likelihood to detract. The current concept of the Net Promoter Score (NPS) that has been adopted by many companies during the last decade—is no longer accurate, precise or actionable. This new metric called the Word of Mouth Index (WoMI) has been tested on hundreds of companies and with over 1.5 million consumers over the last two years. Author Larry Freed details the improvement that WoMI provides within what he calls the Measurement Ecosystem. He then goes on to look at three other drivers of customer satisfaction along with word of mouth: customer acquisition, customer loyalty, and customer conversion. A thrilling chronicle of the tragedy-ridden history of climbing the world's most difficult and unpredictable mountain, by the bestselling authors of *The Mountain and No Shortcuts to the Top* "Gripping . . . reveals a good deal about the rarefied noble-gonzo world of high-altitude mountaineering."—*The New York Times* Ed Viesturs, one of the world's premier high-altitude mountaineers, explores the remarkable history of K2 and of those who have attempted to conquer it. At the same time, he probes the mountain's most memorable sagas in order to illustrate lessons about the fundamental questions mountaineering raises—questions of risk, ambition, loyalty to one's teammates, self-sacrifice, and the price of glory. Viesturs knows the mountain firsthand. He and renowned alpinist Scott Fischer climbed it in 1992 and got caught in an avalanche that sent them sliding to almost certain death before Ed managed to get into a self-arrest position with his ice ax and stop both his fall and Scott's. Focusing on seven of the mountain's most dramatic campaigns, from his own troubled ascent to the 2008 tragedy, Viesturs crafts an edge-of-your-seat narrative that climbers and armchair travelers alike will find unforgettably compelling. With photographs from Viesturs's personal collection and from historical sources, this is the definitive account of the world's ultimate mountain, and of the lessons that can be gleaned from struggling toward its elusive summit. The book entitled *Soil Fertility and Nutrient Management* is a compilation work and most of the information was farmed very critically covering all the main topics of plant nutrition. readers Aconcagua. Denali. Elbrus. Everest. Kilimanjaro. Kosciuszko. Vinson. To a climber, these mountains are known as the Seven Summits* -- the highest peaks on each continent. If you've ever dreamed of climbing Denali or Everest, or joining the even more exclusive "Seven Summiters " club, then Climbing the Seven Summits is the guidebook you need to turn your dream into reality. With Mike Hamill as your guide, you will discover different approaches to tackling the list, as well as details on what you'll need to plan an expedition and what to expect from each climb. For each mountain you'll learn about documents and immunizations, expedition costs, training, guiding options, climbing styles, best seasons, essential gear, day-by-day itineraries, summit routes, maps showing approaches and camps, regional natural history, cultural notes, and even post-climb activities like going on safari in Africa or wine-touring in South America. Throughout you'll also find helpful and inspiring stories from the likes of Conrad Anker, Vern Tejas, Damien Gildea, Eric Simonson, and other famed climbers. Special insider tips from Hamill, based on his years of experience, as well as full-color photographs of each peak round out this collectible guidebook. And, because there remains some controversy about whether Kosciuszko in Australia or Carstenz Pyramid on the island of New Guinea is the "seventh summit," this guidebook to the Seven Summits actually covers eight mountains! *Within mountaineering circles there is debate over which peaks are considered the official Seven Summits. For the purposes of this guidebook, the Seven Summits are based on the continental model used in Western Europe, the United States, and Australia, also referred to as the 'Bass list.' The deadly history of the world's most-dangerous mountain illuminates the many lessons both climbers and non-climbers alike can glean from K2, the aptly named Savage Mountain. K2 is the second highest mountain in the world, at 8611 metres only a couple of hundred metres lower than Everest. It is one of the most unrelenting and testing of the world's 8000-metre peaks. Jim Curran came to K2 as a climbing cameraman with an unsuccessful British expedition, but stayed on through the climbing season. This is his account of the dramatic events of that summer, a story of ambitions both achieved and thwarted on a mountain which all high-altitude climbers take the most pride in overcoming. In 1986 K2 took its toll of those ambitions. Curran vividly describes the moments that contribute to the exhilaration of climbing on the world's most demanding mountain, and he assesses the tragedy of that summer with compassion and impartiality. Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.
