Sunday Times Bestseller As quintessentially British as a plate of fish and chips or a British Bulldog, the boxy, utilitarian Land Rover Defender has become an iconic part of what it is to be British. It is said that for more than half the world's population, the first car they ever saw was a Land Rover Defender. It mirrors many of our national traits, stiff upper-lipped and slightly eccentric. The car has remained relatively unchanged for nearly seven decades and has spawned an industry that includes dozens of publications, car shows, clubs, associations and even model car collectors who dedicate their lives to the Land Rover. To understand this national love affair, Ben has travelled the

length of the British Isles in a Defender, spending time with fellow Land Rover enthusiasts: from visiting Colonel Blashford-Snell, who crossed the jungles of the Darien Gap, to patrolling the streets of Belfast with the Police Service of Northern Ireland (PSNI). Ben has met folk who have converted their beloved Defenders into everything from hearses and coffee shops to works of art and fire trucks. He has travelled from the Red Wharf in Anglesey, Wales onto the Western Isles of Scotland and Islay, the island used as a testing ground by Spencer Wilks in 1947 to put several of the early Series Land Rover prototypes through their paces. After 67 years and 2 million vehicles the Land Rover Defender has ceased production, and this book is a fitting tribute to this most British institution which has stood as a beacon of durability and Britishness across the world. Every Land Rover has its own unique story to tell. This is the story of the world's favourite car. The Advocate is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Land Rover Defender, 90 and 110 Range - 30 Years of the Coil-Sprung 4x4 Models charts the evolution of the coil-sprung Defender vehicles. When Land Rover switched from leaf springs to coil springs for their utility models in 1983, it was a major step forward. The first coil-sprung model, the One Ten, replaced the Series III 109s. The short-wheelbase Ninety replaced the Series III 88s in 1984. From 1990, the models were all re-branded as Land Rover Defenders - 90, 110 and 140 - as the Land Rover range expanded and the marketing teams wanted a new name. Topics covered include: Origins of the Defender and early Ninety and One Ten Models; Development and use of the long-wheelbase models; Special conversions and Defenders built outside the UK, including in Australia and South Africa; Military and emergency service use of the Defender; Detailed examinations of engines and engineering, and the focus on diesel power; The future of the Defender. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from

there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.
