Restoring the Rule of Law Aug 30 2020 It is of the utmost importance to review our policies and practices, and to make changes where we find unseemly and illegal programs or inefficient and counterproductive policies. The time to act is at hand. The urgent need to restore checks and balances under the rule of law is far more important than the controversies that divide us. Instead, understanding the importance of righting the separation-of-powers imbalance and restoring respect for the rule of law should bring all Americans together. But the core principle -- that the preservation of the Constitution's checks and balances, and respect for the rule of law, is essential to effective governance -- endures regardless of what party controls either branch. If we turn a blind eye to this truth, the nation will feel the consequences far into the future.

Work Aug 10 2021 "This book is a tour de force." --Adam Grant, New York Times bestselling author of Give and Take A revolutionary new history of humankind through the prism of work by leading anthropologist James Suzman Work defines who we are. It determines our status, and dictates how, where, and with whom we spend most of our time. It mediates our self-worth and molds our values. But are we hard-wired to work as hard as we do? Did our Stone Age ancestors also live to work and work to live? And what might a world where work plays a far less important role look like? To answer these questions, James Suzman charts a grand history of "work" from the origins of life on Earth to our ever more automated present, challenging some of our deepest assumptions about who we are. Drawing insights from anthropology, archaeology, evolutionary biology, zoology, physics, and economics, he shows that while we have evolved to find joy, meaning and purpose in work, for most of human history our ancestors worked far less and thought very differently about work than we do now. He demonstrates how our contemporary culture of work has its roots in the agricultural revolution ten thousand years ago. Our sense of what it is to be human was transformed by the transition from foraging to food production, and, later, our migration to cities. Since then, our relationships with one another and with our environments, and even our sense of the passage of time, have not been the same. Arguing that we are in the midst of a similarly transformative point in history, Suzman shows how automation might revolutionize our relationship with work and in doing so usher in a more sustainable and equitable future for our world and ourselves.

Theoretical and Practical Theology Volume 1: Intellectual Prerequisites Jan 23 2020 Petrus van Mastricht's Theoretical and Practical Theology presents one of the most comprehensive methods of treating Christian doctrine. In it, Mastricht treats every theological topic according to a four-part approach: exegetical, dogmatic, elenctic, and practical. As a body of divinity, it combines a rigorous, scholastic treatment of doctrine with the pastoral aim of preparing people to live for God through Christ. Students and pastors will find it a valuable model for moving from the text of Scripture to doctrinal formulation that will edify the people of God. Volume 1, Intellectual Prerequisites, provides an introduction to doing systematic theology. Mastricht begins by addressing the nature of the theology, wherein he lays out the proper method, subject matter, and definition of theology. He then discusses Scripture as the rule of doing theology, as it is the only infallible source and foundation for knowing God. Finally, Mastricht gives his rationale for the best distribution of theological topics. This volume also includes Mastricht's homiletical aid "The Best Method of Preaching," as well as a biographical sketch by Adriaan Neele to help readers understand the significance of Mastricht's life and ministry.
