Once nearly as ubiquitous as dictionaries and cookbooks are today, letter-writing manuals and their predecessors served to instruct individuals not only on the art of letter composition but also, in effect, on personal conduct. Poster and Mitchell contend that the study of letter-writing theory, which bridges rhetorical theory and

grammatical studies, represents an emerging discipline in need of definition. In this volume, they gather the contributions of eleven experts to sketch the contours of epistolary theory and collect the historic and bibliographic materials - from Isocrates to email - that form the basis for its study. During the 18th century, letter manuals became the most popular form of conduct literature. They were marketed to and used by a wide spectrum of society, from maidservants and apprentices, through military officers and merchants, to gentlemen, parents and children. This work presents the most influential manuals from both sides of the Atlantic. This Handbook considers the myths and untruths that currently exist in international development and education. Using historic and contemporary evidence, this compendium redefines the international development narrative through a new understanding of & A fascinating exploration of the relationship between American culture and music as defined

by musicians, scholars, and critics from around the world. Gives permanence and context to Gallman's influential economic research on growth theory. When we think about history, we often think about people, events, ideas, and revolutions, but what about the numbers? What do the data tell us about what was, what is, and how things changed over time? Economist Robert E. Gallman (1926-98) gathered extensive data on US capital stock and created a legacy that has, until now, been difficult for researchers to access and appraise in its entirety. Gallman measured American capital stock from a range of perspectives, viewing it as the accumulation of income saved and invested, and as an input into the production process. He used the level and change in the capital stock as proxy measures for long-run economic performance. Analyzing data in this way from the end of the US colonial period to the turn of the twentieth century, Gallman placed our knowledge of the long nineteenth century—the period during

which the United States began to experience per capita income growth and became a global economic leader—on a strong empirical foundation. Gallman's research was painstaking and his analysis meticulous, but he did not publish the material backing to his findings in his lifetime. Here Paul W. Rhode completes this project, giving permanence to a great economist's insights and craftsmanship. Gallman's data speak to the role of capital in the economy, which lies at the heart of many of the most pressing issues today. InfoWorld is targeted to Senior IT professionals. This monograph presents a thorough investigation into the phenomenon of the Chinese Triads, their ritual and mythological lore, and their meanings and functions. On the foundations of a wide variety of primary and secondary sources, among which also recent Chinese scholarship, the author interprets Triad

myth and ritual in their Chinese religious context. The work includes fine discussions of Triad symbolism, initiation rituals, blood covenants, foundation myth, eschatology, political ideas and other topics. The origins of the Chinese Triads are newly interpreted, as well as the meanings and functions of their ritual and mythological lore, and how these fitted into local religious culture. Identifying the age of a property is a fundamental step in understanding its form of construction and in being prepared to differentiate between the characteristic defects of that age of property and defects which are more unusual and may warrant particular care in investigation and assessment. This second edition of *Inspections and Reports on Dwellings: Assessing Age* updates the market context within which surveyors and valuers are now operating. In particular it has a new section on post-2000 properties, reflecting the profound impact of Government policies and environmental concerns on the modern urban

landscape. The book is divided into thirteen age bands with over seventy color photographs of dwellings for each period. A commentary on each age band outlines the social, environmental and technical influences on properties being built at the time, helping to explain why they look as they do. A broad range of dwellings is covered: large and small, private and public sector, old and new, and particular features which help to place a dwelling within one of the defined periods are highlighted in comments on the photographs. This book is intended for all those engaged in inspecting dwellings, whether experienced, newly qualified or studying for appropriate qualifications to become members of professional institutions.
