Charles Schwab and Co., Inc. presents an interactive worksheet that allows users to determine retirement goals and the needed monthly savings recommendations to achieve those goals. The worksheet requires users to input age, age to retire, expected retirement expenses, and current investments. Any book on planning has to be easy to read and full of examples on how to do it with forms and illustrations. That is exactly what this book is and why it is called a "guidebook". The fact that most people do not plan well is well documented by the demographics of the population and the economic situation that a growing senior population is faced with now due to poor planning or no planning earlier in their lives. Since company's are run by people they exhibit the idiosyncrasies of the people who run them. Many company's do not have strategic plans or operating plans. Some firms do not even have a budget and operate on a day-by-day basis. The obvious result of this is crisis management, cash flow problems and the constant risk of going out of business. Many company's both large and small have disappeared due to the lack of a plan and this has been well documented in the business press. Managers do not have a plan for their business because they do not have a plan for themselves. Planning is not something that we are born with a natural ability to do well, or in many cases - at all. Planning is a learned skill and there is a need for simple step-by-step guides which is what this book is about. It has been written as a result of years of experience that the author has had working with hundreds of company's. The foundation for the book is a process that the author calls the "Plan-for-Planning" - a five step exercise that he has used to help managers build business plans for their company's. It is a proven formula that has resulted in increased profitability, operational efficiencies and the optimization of the overall allocation of resources for the author's clients. It also has been the basis for the development of executive level seminars by the author that have been promoted and implemented by BUSINESS WEEK and Inc. Magazine domestically, and Frost & Sullivan internationally. The initial publication of this book was by Inc. as a result of the success of the seminar series for their audience - growing firms. Articles have been written about the Plan-for-Planning process and it has been instrumental in the development of business plans that have resulted in company's being sold for a premium to the shareholders as a result of the quality of the business planning process. The book has been used by many managers and in some cases continues to be a reference guide for the new businesses that they have become involved with. It is really an easy to use guide for developing a business/strategic plan for any business. A level 3 Oxford Bookworms Library graded reader. This version includes an audio book: listen to the story as you read. Written for Learners of English by Tim Vicary.

This volume is a unique contribution to the study of language policy and education for English Learners because it focuses on the decade long implementation of "English Only" in Arizona. How this policy influences teacher preparation and classroom practice is the central topic of this volume. Scholars and researchers present their latest findings and concerns regarding the impact that a restrictive language policy has on critical areas for English Learners and diverse students. If a student's language is sanctioned, do they feel welcome in the classroom? If teachers are only taught about subtractive language policy, will they be able to be tolerant of linguistic diversity in their classrooms? The implications of the chapters suggest that Arizona's version of Structured English Immersion may actually limit English Learners' access to English.
