LETTER BRIEF For courses in Supervisory
Management, Supervision, and First-Line

Management. Written by well-respected educators in the field, this skills-focused introduction to supervision captures the reality of supervising in the 2000s. It takes students on the job by first explaining the job of supervisor and then featuring a wide range of examples of how supervisors operate in real situations. The focus is on key skills needed for effective supervision e.g., goal-setting, delegating, budgeting, interviewing, negotiating, counseling, coaching, conducting groups meetings, and handling grievances. Rich in instructional aids and experiential opportunities, it features lots of vignettes and visual stimuli to make concepts come alive. NOW PACKAGED WITH EACH NEW STUDENT TEXT! Self-Assessment Library v. 2.0 CD-ROM now accompanies each Robbins, Supervision Today! 4e textbook. This unique easy-to-use assessment tool allows you to assess your knowledge, beliefs, feelings, and actions in regard to a wide range of personal skills, abilities, and interests. Automatically graded, self-scoring exercises. Generates individual analysis, which can be printed or emailed. The 45 exercises located on CD-Rom are divided into three parts - What About Me?, Working With Others, and Life in Organizations as listed in the Table of Contents. This review manual prepares students to

successfully pass the ANCC Psychiatric-Mental Health Nurse Practitioner board certification examination. It encompasses all of the essential knowledge required, uses a succinct outline format that highlights critical detail, and systematically follows the test blueprint so that those taking the exam will be optimally prepared. The Psychiatric-Mental Health Nurse Practitioner Certification Review Manual begins with an overview of the certification examination, self-care, and test tips; the role of the psychiatric-mental health nurse practitioner, scope of practice, and regulations; and the theoretical foundations of care. Other topics examined include the neuroanatomy and physiology of mental illness; psychopharmacology; and physical assessment, diagnostic tests, and differential diagnosis. A wide range of psychiatric disorders, as organized in the DSM-5, are also reviewed. Each of the chapters include learning objectives and end-of-chapter review questions. The review manual concludes with a 150-question practice test.

KEY FEATURES Reflects the latest ANCC test blueprint Includes test-taking strategies and tips for preparing for the big day; scope of practice; and theoretical foundations of care Covers a wide range of psychiatric disorders, as organized in the DSM-5 Includes end-of-

chapter review questions and rationales PLUS a valuable 150-question practice test with rationales—more than 400 questions in total An Introduction to Reading Biblical Wisdom Texts is designed for undergraduate students and laypersons who are studying Scripture. Part One poses fundamental questions addressed by the genre of wisdom literature, explores definitions of wisdom and folly from the biblical perspective, describes the characteristics and forms of wisdom poetry, and places Israel's wisdom tradition in a wider historical-cultural context. Part Two addresses the practical wisdom associated with Proverbs, treating both the contents and the academic questions that arise. Parts Three and Four focus on Ecclesiastes and Job, respectively, and on the interpretive challenges they raise. Finally, Part Five recognizes the place of Song of Songs in the wisdom tradition. This text is a highly accessible and engagingly written introduction to the Bible's wisdom literature and is built on a strong scholarly foundation. Elaine A. Phillips has served as professor of biblical and theological studies at Gordon College (Wenham, MA) since 1993 and for the past two decades has also been a visiting professor at Jerusalem University College. She is the author of numerous scholarly articles on the

Old Testament and has served on the editorial board of the Bulletin for Biblical Research. Phillips has received several distinguished teaching awards and regularly lectures on the Bible to both professional societies and lay audiences. The "BASIC Ph" model of coping and resiliency, developed by Prof. Mooli Lahad and Dr. Ofra Ayalon, was the first to describe coping as an on-going effort to manage life challenges. This is the first book to be published on this world-renowned approach, widely used as an effective resiliency assessment, intervention, and recovery model. Underpinning the model is the suggestion that every person has internal powers, or coping resources, which can be mobilized in stressful situations; the effort to survive coming from a healthy rather than a pathological instinct. The categorization of these coping resources gives the model its name: Belief, Affect, Social, Imagination, Cognition, Physical. This edited volume outlines the theory behind the "BASIC Ph" approach, presents practice-based and research-based interventions and explains their application during and in the wake of both natural and man-made disasters. With wide-ranging chapters from authoritative contributors, the book shows how the "BASIC Ph" model can be successfully applied in family, community, education, health, and

business settings. This will be an invaluable text for professionals, academics, and students with an interest in trauma and coping with crisis and disaster. This book constitutes the refereed proceedings of the 8th International Conference on Games and Learning Alliance, GALA 2019, held in Athens, Greece, in November 2019. The 38 regular papers presented together with 19 poster papers were carefully reviewed and selected from 76 submissions. The papers cover the following topics: serious game design and pedagogical foundations; AI and technology for SG; gamification; applications and case studies; and posters. The chapter "Cyber Chronix, Participatory Research Approach to Develop and Evaluate a Storytelling Game on Personal Data Protection Rights and Privacy Risks" is available open access under a CC BY 4.0 license at link.springer.com. Cinderella goes to the con in this fandom-fueled twist on the classic fairy tale romance—now with a special Starfield bonus scene! Part romance, part love letter to nerd culture, and all totally adorbs, Geekerella is a fairy tale for anyone who believes in the magic of fandom. Geek girl Elle Wittimer lives and breathes Starfield, the classic sci-fi series she grew up watching with her late father. So when she sees a cosplay contest for a new Starfield

movie, she has to enter. The prize? An invitation to the ExcelsiCon Cosplay Ball, and a meet-and-greet with the actor slated to play Federation Prince Carmindor in the reboot. With savings from her gig at the Magic Pumpkin food truck (and her dad's old costume), Elle's determined to win...unless her stepsisters get there first. Teen actor Darien Freeman used to live for cons—before he was famous. Now they're nothing but autographs and awkward meet-and-greets. Playing Carmindor is all he's ever wanted, but the Starfield fandom has written him off as just another dumb heartthrob. As ExcelsiCon draws near, Darien feels more and more like a fake—until he meets a girl who shows him otherwise.

Course review and quick clinical reference/250 Board-type questions with annotated answers/comprehensive examination. Published in 1997. This book develops a postmodernist critique of philosophy - although not the postmodernism of literary philosophers such as Derrida. This postmodernism is one of ecological limitationism coupled with a practical common sense 'realism'. The authors affirm the reality of life-world and the primacy of practice against materialists, physicalists and reductionists. They attempt to show that orthodox Anglo-American analytic philosophy is not merely incapable of completing its own

quest to supply a regionally justified system of reality, but, more importantly, it fails as well to meet the challenges of the age. Thirty-five papers from the third International DNA Sampling Conference, held in Montreal in September 2002, provide a critical discussion of the socio-ethical and legal issues surrounding DNA sampling in communities and populations around the globe. Contributors address topics related to biobanks and databases; community engagement; confidentiality. This volume has a special thematic focus on the architecture of neural networks. It is part of a series that reviews research in natural and synthetic neural networks, as well as research in modelling, analysis, design, and development of neural networks in software and hardware areas. Contributions from researchers and practitioners serve as a platform for discussion of topics of interest to the neural network and cognitive information processing communities. Book & CD-ROM.
