History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence

requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience). Rytteriets historie fra de tidligste tider, da hesten første gang blev anvendt i krig og til og med Fransk Tyske Krig 1870 - 1871, herunder beskrivelser af rytteriets organisation gennem tiderne, den taktiske anvendelse af rytteriet samt beskrivelse af slag, hvor rytteriet har spillet en rolle. Bogen er en prisopgave stillet af den russiske generalinspektør for det russiske rytteri i 1874 storfyrst Nikolaj efter bemyndigelse af Zar Alexander II. For many centuries, the history of the crusades, as written by Western historians, was based solidly on Western sources. Evidence from the Islamic societies that the crusaders attacked was

used only sparingly - in part because it was hard for most westerners to read, and in part because much of it was inaccessible even for historians who did speak Arabic. Carole Hillenbrand set out to re-evaluate the sources for the crusading period, not only looking with fresh eyes at known accounts, but also locating and utilizing new sources that had previously been overlooked. Her work involved her in conducting extensive evaluations of the new sources, assessing their arguments, their evidence, and their reasoning in order to assess their value and (using the critical thinking skill of analysis, a powerful method for understanding how arguments are built) to place them correctly in the context of crusade studies as a whole. The result is not only a history that is more balanced, better argued and more adequate than most that have gone before it, but also a work with relevance for today. At a time when crusading imagery and mentions of the current War on Terror as a 'crusade' help to fuel political narrative, Hillenbrand's evaluative work acts as an important corrective to oversimplification and

misrepresentation. Increasingly, historians acknowledge the significance of crusading activity in the fifteenth century, and they have started to explore the different ways in which it shaped contemporary European society. Just as important, however, was the range of interactions which took place between the three faith communities which were most affected by crusade, namely the Catholic and Orthodox worlds, and the adherents of Islam. Discussion of these interactions forms the theme of this book. Two essays consider the impact of the fall of Constantinople in 1453 on the conquering Ottomans and the conquered Byzantines. The next group of essays reviews different aspects of the crusading response to the Turks, ranging from Emperor Sigismund to Papal legates. The third set of contributions considers diplomatic and cultural interactions between Islam and Christianity, including attempts made to forge alliances of Christian and Muslim powers against the Ottomans. Last, a set of essays looks at what was arguably the most complex region of all for inter-faith relations, the Balkans, exploring the influence of crusading ideas in

the eastern Adriatic, Bosnia and Romania. Viewed overall, this collection of essays makes a powerful contribution to breaking down the old and discredited view of monolithic and mutually exclusive "fortresses of faith". Nobody would question the extent and intensity of religious violence in fifteenth-century Europe, but this volume demonstrates that it was played out within a setting of turbulent diversity. Religious and ethnic identities were volatile, allegiances negotiable, and diplomacy, ideological exchange and human contact were constantly in operation between the period's major religious groupings. Late Antique artefacts, and the images they carry, attest to a highly connected visual culture from ca. 300 to 800 C.E. On the one hand, the same decorative motifs and iconographies are found across various genres of visual and material culture, irrespective of social and economic differences among their users - for instance in mosaics, architectural decoration, and luxury arts (silver plate, textiles, ivories), as well as in everyday objects such as tableware, lamps, and pilgrim vessels. On the other hand, they are

also spread in geographically distant regions, mingled with local elements, far beyond the traditional borders of the classical world. At the same time, foreign motifs, especially of Germanic and Sasanian origin, are attested in Roman territories. This volume aims at investigating the reasons behind this seemingly globalised visual culture spread across the Late Antique world, both within the borders of the (former) Roman and (later) Byzantine Empire and beyond, bringing together diverse approaches characteristic of different national and disciplinary traditions. The presentation of a wide range of relevant case studies chosen from different geographical and cultural contexts exemplifies the vast scale of the phenomenon and demonstrates the benefit of addressing such a complex historical question with a combination of different theoretical approaches. World History Teaching in Asia is the first broad survey of the content and approaches used to teach world history in secondary schools and colleges in Asia. The collection has been crafted by scholars and educators whose

goal was to shed light on the importance of history education and to foster understanding of and between Asian countries. These essays show how the teaching of world history in Asian countries has developed since World War II, with many interesting parallels, including the issue of Eurocentrism, but also distinctive national trends, and considerable changes over time. At a time when many Asian countries are making great strides in education, this study of history education in Asia will be of real interest to educators, history scholars, and policy-makers worldwide. This book is a volume in the Penn Press Anniversary Collection. To mark its 125th anniversary in 2015, the University of Pennsylvania Press rereleased more than 1,100 titles from Penn Press's distinguished backlist from 1899-1999 that had fallen out of print. Spanning an entire century, the Anniversary Collection offers peer-reviewed scholarship in a wide range of subject areas. The six volumes of A History of the Crusades will stand as the definitive history of the Crusades, spanning five centuries, encompassing Jewish, Moslem, and

Christian perspectives, and containing a wealth of information and analysis of the history, politics, economics, and culture of the medieval world. The six volumes of A History of the Crusades will stand as the definitive history of the Crusades, spanning five centuries, encompassing Jewish, Moslem, and Christian perspectives, and containing a wealth of information and analysis of the history, politics, economics, and culture of the medieval world. This is the first volume in a three-volume set which will present a complete gazetteer of the 400 church buildings known to have existed in the Crusader Kingdom of Jerusalem. Each entry features a description, historical explanation and, where possible pictorial representation. The two hundred years

which cover, roughly speaking, the actual period of the Holy War, are crammed with an interest that never grows dim. Gallant figures, noble knights, generous foes, valiant women, eager children, follow one another through these centuries, and form a pageant the colour and romance of which can never fade, for the circumstances were in themselves unique. The two great religious forces of the world-Christianity and Islam, the Cross and the Crescent-were at grips with one another, and for the first time the stately East, with its suggestion of mystery, was face to face with the brilliant West, wherein the civilisation and organisation of Rome were at last prevailing over the chaos of the Dark Ages... Perhaps no work of history written in the 20th century has done more to undermine an existing consensus and cause its readers to re-evaluate their own preconceptions than has Jonathan Riley-Smith's revisionist account of the motives of the first crusaders. Riley-Smith's thesis - based on extensive original research and firmly rooted in his refusal to uncritically accept the evidence or reasoning of earlier

historians - is that the majority of the men who travelled to the east on crusade in the years 1098-1100 were primarily motivated by faith. This finding, which ran directly counter to at least four centuries of consensus that other motives, not least greed for land, were more important, has helped to stimulate exciting reappraisals of the whole crusading movement. Riley-Smith backed it up with forensic examination of the key crusader-inspiring speech delivered by Pope Urban II, looking to clarify the meanings of five competing contemporary accounts in order to understand how an initially simple, and rather confused, appeal for help became a sophisticated rationale for the concept of 'just war.' With review questions added. Engaging the Crusades is a series of volumes which offer windows into a newly-emerging field of historical study: the memory and legacy of the crusades. Together these volumes examine the reasons behind the enduring resonance of the crusades and present the memory of crusading in the modern period as a productive, exciting and much needed area of investigation. The Crusades in the

Modern World evaluates a broad range of contemporary uses of the crusades and crusading to answer key questions about crusading today and how the crusades are understood. Each chapter demonstrates how perceptions of the crusades are deployed in causes and conflicts which mark the present, exploring the ways in which those perceptions are constructed and received. Throughout the book there is a focus on the use of crusading rhetoric and imagery to frame and justify violence, including crusading discourses employed by both Islamic fundamentalists and far-right terrorists, and the related deployment of 'Reconquista' rhetoric by populist movements in Europe. The use of the crusades for building national identity is also a recurring theme, while chapters on academic engagement with the crusades and on the ways in which Wikipedia articles on the crusades are created and contested highlight the ongoing production of knowledge about crusading. The Crusades in the Modern World is ideal for scholars of the crusades as well as for military historians and historians of memory.
