The impact of environmental damage on human rights - whether civil and political rights or welfare and labor rights - is becoming ever more widely appreciated. It has direct and important bearing on the behavior of companies, especially transnationals, governments and other organizations. Out of the conflicts are emerging new norms of conduct. The contributors draw on the tools and insights of a range of disciplines, including law, anthropology, economics, geography and social science, to analyze the issues and show how new standards that protect rights and liberties can be established. An original and groundbreaking volume. Contributors include D Brown; P Girot; P Hirsch; F MacKay; V Mischenko; J Mugabe; E Rosenthal; A Sari; R Thornton; G Tumushabe; S Wang; C Wu. This proceedings contains the works of both experimental and theoretical aspects of high temperature superconductivity with special emphasis on the results obtained by nuclear methods (e.g. neutron scattering, γ SR, positron annihilation and Mössbauer spectroscopy). Motion-Free Super-Resolution is a compilation of very recent work on various methods of generating super-resolution (SR) images from a set of low-resolution images. The current literature on this topic deals primarily with the use of motion cues for the purpose of generating SR images. These cues have, it is shown, their advantages and disadvantages. In contrast, this book shows that cues other than motion can also be used for the same purpose, and addresses both the merits and demerits of these new techniques. Motion-Free Super-Resolution supersedes much of the lead author's previous edited volume, "Super-Resolution Imaging," and includes an up-to-date account of the latest research efforts in this fast-moving field. This sequel also features a style of presentation closer to that of a textbook, with an emphasis on teaching and explanation rather than scholarly presentation. This NATO Advanced Study Institute held at Gei10, Norway, April 16th-27th 1979, was the fifth in a series devoted to the subject of phase transitions and instabilities. The application to NATO for the funding of this ASI contained the following para graphs: "Traditionally one has made a clear distinction between solids and liquids in terms of positional order, one being long-ranged and the other at most short-ranged. In recent years experiments have revealed a much more faceted picture and a less sharp distinction between solids and liquids. As an example one now has 3-dimensional (3-D) liquids with 1-D density waves and 3-D solids with 1-D-liquid molecular chains. The subsystems have the common feature of 10w dimensional systems: a strong tendency for fluctuations to appear. Although the connection between fluctuations and dimensionality, and the suppression of long-range order by fluctuations, was pointed out as early as 1935 by Peierls and by Landau, it is in the last five years or so that theoretical work has gained momentum. This development of understanding started ten years ago, however, much inspired by the experimental work on 2-D spin systems. Key resolutions from the first fifty years of the United Nations General Assembly. The field of conflict resolution centers on relationships and ways of approaching methods for problem solving. These relationships and approaches vary deeply depending on the individual, society, and background, proving that cultural perspective is fundamental to any dispute intervention. Re-Centering Culture and Knowledge in Conflict Resolution Practice is a collection of original essays by scholars and practitioners of conflict resolution and others working in marginalized communities. The volume offers a sampling of the cultural voices essential to effective practice yet not commonly heard in the discourse of conflict resolution. The authors explore the role of culture, race, and oppression in resolving disputes. Drawing on firsthand experience and sound research, the authors address such issues as culturally sensitive mediation practices, the diversity of perspectives in conflict resolution literature, and power dynamics. The first anthology of its kind, this book combines personal narratives with formal scholarship. By melding these varied approaches, the authors seek to inspire activism for social justice in today's multicultural society. This book provides you with the perfect introduction to your studies in peace and conflict resolution and equips you with the tools you need to analyse real-world cases. Drawing on recent research and examples from around the world, the new edition: Explores the ongoing situation in Syria and the events and repercussions of the Arab Spring Examines the issue of internet security and the relationship between social media and peace Draws on the cases of Libya and Syria to discuss the principle of Responsibility to Protect (R2P) Outlines the functions of key regional and Non-Governmental organisations Includes a companion website with annotated further reading lists, and links to free SAGE journal articles, reports and data sets This is an essential text for all students, lecturers and researchers of peace and conflict resolution in international relations, global politics and political science. Solid State This book introduces recent developments in the study of algebras defined by quadratic relations. One of the main problems in the study of these (and similarly defined) algebras is how to control their size. A central notion in solving this problem is the notion of a Koszul algebra, which was introduced in 1970 by S. Priddy and then appeared in many areas of mathematics, such as algebraic geometry, representation theory, non commutative geometry, K -theory, number theory, and non commutative linear algebra. The authors give a coherent exposition of the theory of quadratic and Koszul algebras, including various definitions of Koszulness, duality theory, Poincare-Birkhoff-Witt-type theorems for Koszul algebras, and the Koszul deformation principle. In the concluding chapter of the book, they explain a surprising connection between Koszul algebras and one-dependent discrete-time stochastic processes. The book can be used by graduate students and researchers working in algebra and any of the above-mentioned areas of mathematics. In Chapter 2, we consider the simplest case of this question: For what Hilbert functions is there only one possible set of graded Betti numbers? We characterize these Hilbert functions for ideals in $k[x, y]$. In more variables, the question is more difficult, and we give examples of some families of Hilbert functions for which there is a unique set of attainable graded Betti numbers. Cutting a cake, dividing up the property in an estate, determining the borders in an international dispute - such problems of fair division are ubiquitous. Fair Division treats all these problems and many more through a rigorous analysis of a variety of procedures for

allocating goods (or 'bads' like chores), or deciding who wins on what issues, when there are disputes. Starting with an analysis of the well-known cake-cutting procedure, 'I cut, you choose', the authors show how it has been adapted in a number of fields and then analyze fair-division procedures applicable to situations in which there are more than two parties, or there is more than one good to be divided. In particular they focus on procedures which provide 'envy-free' allocations, in which everybody thinks he or she has received the largest portion and hence does not envy anybody else. They also discuss the fairness of different auction and election procedures. Metabolism, Structure and Function of Plant Tetrapyrroles, Volume 91, the latest release in the Advances in Botanical Research series is a compilation of the current state-of-the-art on the topic. Presents the latest release in the Advances in Botanical Research series Provides an Ideal resource for post-graduates and researchers in the plant sciences, including botany, plant biochemistry, plant pathology and plant physiology Contains contributions from internationally recognized authorities in their respective fields "This Ebook is edited by Sandra Hodge, a recognized expert in the field of macrophage dysfunction in chronic lung disease. The book consists of 8 chapters which provide a full coverage of macrophage function in both healthy and chronically diseased lungs, " This book provides readers with a provocative and insightful examination of conflict resolution theory and practice, taking stock of the ideas, assumptions and practices in this emerging field. Focusing on biology, culture, management, psychology, social psychology and more, the book raises vital questions in the examination of whether and how to more effectively resolve conflict. Central to its thesis is the interaction between the skills of resolving conflict and the societal pressures for conflict's continuation. Proceedings of the International Conference, Antwerp, Belgium, September 6-10, 1982 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873) Grade level: k, 1, 2, 3, 4, 5, 6, e, i, p, t. This volume addresses several core questions regarding the nature of law in China and its future development. In particular, these articles shed light on whether the rule of law ideal is commensurable with government based on the Chinese Communist Party. Beginning virtually from scratch, China has established a comprehensive legal system that boasts a constitution, primary and secondary legislation and plentiful regulations covering most areas of public and private life. Yet, as these articles discuss, its courts are enmeshed in Party and state hierarchies and are not empowered to directly apply constitutional principles or rights, ensuring that the law is subordinate to national public policy goals. Legal and extra-legal methods for punishing wrongdoing and resolving disputes also raise questions of due process of law. Ultimately, the question is therefore whether China's legal system, if eschewing formalised human rights, is developing a capacity to protect fundamental human dignity. "The book will be of interest to students of conflict and peace studies, both advanced undergraduate and postgraduate, as well as students of International Relations studying conflict resolution."--Jacket. A textbook for students and a must-have guide for practitioners Examining the conflict in Guyana, the author finds a country floundering in ethnic insecurity that the state has failed to constructively address, guaranteeing continuing violence and instability. He examines the roots of conflict between Afro-Guyanese and Indian-Guyanese, arguing that the state's continuing reliance on coercive force to repress minorities will fail to end the conflict. He proposes a model called Collaborative Analytical Problem Solving as a framework for ending the conflict and briefly examines the Israeli-Palestinian conflict and the South African experience as lessons in conflict resolution. Annotation copyrighted by Book News, Inc., Portland, OR With its comprehensive coverage of political and security matters, human rights issues, economic and social questions, legal issues, and administrative and budgetary matters, the Yearbook of the United Nations stands as the authoritative reference work on the annual activities and concerns of the Organization. Fully indexed, the Yearbook includes all major General Assembly, Security Council and Economic and Social Council resolutions and decisions, uniquely placing them in a narrative context of United Nations consideration, deliberation and action. This sixty-eighth volume presents the work of the United Nations in dealing with recurring conflicts with severe humanitarian consequences including in the Syrian Arab Republic, where more than 12 million people were in need of basic food, clothing and shelter. The volume also highlights the Organization's rapid response to an escalatory global health emergency—the Ebola virus disease outbreak across West Africa. It documents the Organization's coordination of policy discussions to finalize a global sustainable development agenda, with the security of future generations as the core concern; and its efforts to rebuild societies emerging from conflict while keeping the fragile peace in other places. It further details the entry into force of the landmark Arms Trade Treaty, the missile downing of a passenger airliner in the midst of a geopolitical crisis in eastern Ukraine, and securing international human rights and humanitarian law and prosecuting abusers. Built on the premise that trust is one of the most important factors in intergroup relations, conflict management and resolution at large, this volume explores trust and its mechanisms and operations especially in the Israeli-Palestinian conflict. Significantly, this volume focuses not only on the nature of trust and distrust in the Israeli-Palestinian conflict, but it also explores how it is possible to build and increase trust on both sides in the conflict, a necessity in order to advance the stalled peace process. As trust is a concept that is interdisciplinary by nature, so are this volume's contributors: sociologists, philosophers, sociologists, social psychologists, political scientists, as well as experts in the Middle East, Islam, Judaism and the Israeli-Palestinian conflict bring together real multidisciplinary perspectives that complement each other and then provide a comprehensive picture about the nature of trust and distrust and its ramification and implications for the Israeli-Palestinian conflict. Divided into five thematic parts, the volume begins with by examining the theoretical basis of trust research from multiple perspectives. Then, it presents chapters on trust, distrust, and trust-building in other conflicts around the world. The third part is a unique feature of this volume as it takes a contextual approach: it emphasizes the importance of particular cultural and religious considerations on both sides of the conflict. The thrust of the book is examined in the next section. Part IV discusses and analyses various aspects of trust, and specifically distrust, in the context of the Israeli-Palestinian conflict. Significantly, the chapters of this part take the perspectives of the participants in the conflict: Israeli Jews, Palestinians and Israeli Arabs. Finally, the volume concludes by providing an integrative conceptual perspective based on the principles of social and political psychology. An important goal of this volume is to not only explore trust and distrust in an intractable conflict, but also to provide practical multi-disciplinary outlooks and implications to advance trust building in two conflict ridden societies—Israeli and Palestinian, and other societies around the world. Uses an interdisciplinary and empirical approach to analyze the process of institutionalizing alternative dispute resolution (ADR) for shareholder disputes in Hong Kong. Business, Conflict Resolution and Peacebuilding examines the actions currently being taken by businesses in areas of violent conflict around the world, and explores how they can make a significant contribution to the resolution of violent conflicts through business-based peacebuilding. This book combines two approaches to provide a comprehensive look at the current state and future of business- based peacebuilding. It marries a detailed study of documented peacebuilding activities with a map of the possibilities for future business-related conflict work and pragmatic suggestions for business leaders, conflict resolution practitioners, and peacebuilding organizations. The use of the label 'business-based peacebuilding' is new and signifies actions business can take beyond simple legal compliance or making changes to avoid creating a conflict. Although business-based peacebuilding is new, examples are included from around the world to illustrate that, working together, businesses have a strong contribution to make to the creation of peaceful societies. The book advocates pragmatic peacebuilding, which is not overly concerned with cause-driven models of conflict. Instead, pragmatic peacebuilding encourages an examination of what is needed in the conflict and what can be provided. This approach is free of some of the ideological baggage of traditional peacebuilding and allows for a much wider range of participants in the peacebuilding project. This book will be of much interest to students of peace studies, conflict resolution, international security and business studies, as well as to practitioners and business leaders. Derek Sweetman is Dispute Resolution Director for Better Business Bureau in Washington, DC and Instructor at New Century College, George Mason University, USA. The field of solar energy conversion has become an important discipline with a recognized potential to significantly contribute to the world supply of energy. It is diversified and encompasses a wide variety of disciplines - from mechanical engineering to physics, from biology to architecture, from ocean science to agriculture, from chemistry to atmospheric science, to name some of the major fields. It involves fields which have matured to the engineering aspects, such as the conversion of solar energy into heat or of wind into shaft work. It includes other fields in which more basic science research is necessary to unravel the micro-structures of nature, as, for example, for photovoltaic conversion or for certain bioengineering tasks. Several of these fields have elements which have been common knowledge for centuries but sometimes forgotten at times of cheap energy supplies, while others have barely started with first studies. Most of the fields have seen during the last decade a substantial advance in sophistication, in theoretical understanding, in demonstrated feasibility, in developing hardware, in field testing, with some moving into a phase of initial commercialization. This book contains 70 role-plays in 12 separate categories to provide both existing professionals and academic instructors the examples needed to train individuals to address conflicts. Categories covered include divorce mediation, community mediation, settlement mediation, negotiation, facilitation, public policy debate, estate planning mediation, pastoral mediation; police negotiation, gang intervention, crisis intervention training, international mediation, and international conflict intervention.
