Circles Apr 11 2021 BOOK DESCRIPTION FOR BOOK'S PAGE ON THE XLIBRIS WEB SITE In 2003, William Oscar Jones had become totally dissatisfied with the senseless and no thrilling productions of Hollywood. Time and time again he had watched movies with senseless scenes and non-dramatic endings. So William set out in the spring of 2003 to produce a better movie by writing a book that he felt would reflect the true qualities of a satisfactory movie. First of all, William desired to write a book where every scene would relate to the theme, title, and ending. He wanted a book that would convey moral principles and teach valuable lessons. As a man of little income, William was very familiar with the day to day difficulties of the common man. So he wanted to write a book that would appeal to the common man as well as the rich. The idea for William's book Circles started in January of 2003, while William and his fellow security officer were conversing in front of the home of the World Bank president. William and his associate were parked in a security vehicle guarding the president's house when William made the statements, "The president could at least send his maid to us with glasses of water or food. I wonder how he would feel if he were out here in this cramped vehicle and we showed no concern for his welfare?" From those statements developed the theme for William's book Circles—a rich man replacing the position of a poor man. The thoughts of that conversation had disappeared by spring of that year, until William saw his fifth and final dissatisfying movie. After seeing that movie, William became frustrated and thought to himself, "If Hollywood can't produce a movie decent enough to satisfy me, then hell, I will satisfy myself." William knew that he could write a better movie than the ones he had witness. So in the spring of 2003, William set out to write a book, and as he thought about various themes, the conversation he had had in January came back to mind and the theme for Circles was born. William had interacted with many wealthy people through his job at World Bank and as a caterer for a popular Indian restaurant in Washington, DC, and he had developed a strong dislike for them. He did not dislike wealthy people simply out of envy, but through his interactions with them, William discovered that most people of wealth have very little moral character and concern for people less fortunate than they. He discovered that most wealthy people are proud and arrogant and feel that they are better than the average person. So, after experiencing both sides, rich life and poor life, William decided to write a book that would appeal to both readers, rich and poor. So came Circles. Circles is a story about a young man name John Sellers, who by nature is a kind and caring kid. But due to the

effects of his racist father, who is a member of Southern Knights of the Ku Klux Klan, John grows to become a cruel and racist young man. John's biological father eventually dies, and John's mother Kate remarries to an extremely moral man name Peter Braxton. Peter takes on the task of trying to reverse the racist and cruel ways of John, but Peter would eventually learn that John is too deeply rooted into the racist ways of his father. After training and instilling in John all the moral principles that he could, Peter gave up on what seemed to be a hopeless effort, and he warned John that one day his evil ways would come back to haunt him. John's last name became Braxton after his adoption by Peter Braxton, and later in life he becomes a billionaire, the world's third wealthiest person. John would eventually encounter a tragedy that would reduce him to the level of a bum, and the only people who would be willing to assist him are the very people that he had once abused and despised. After being redeemed by this experience, John would ultimately become the truly kind person that he really is and

Ford Tough Feb 28 2020 Get Fords complete story in Ford Tough: 100 Years of Ford Trucks and see why they've dominated the truck market, selling 1.5 million trucks every year in the US alone. In July 1917 Ford Motor Company introduced a one-ton chassis for commercial trucks, marking what many historians feel was its official entry into the dedicated truck business. Sure, after-market pickup beds could be added to a Model T car to convert it to a pickup, but with the debut of the rugged Model TT truck chassis, Ford was firmly in the truck market. Eight years later, Ford introduced its first factory-produced pickup, a sturdy half-ton job the public loved. During the century that has passed since that first Ford truck chassis, the F-series has become the best-selling truck in the world, and the best-selling vehicle of any type in America. Ford Tough: 100 Years of Ford Trucks tells the entire Ford truck story from the very beginning, when Ford got its start in truck production. This book provides the history of the wide array of models Ford has built over the past century, including the Model A roadster pick-up, stylish 81C pickups, legendary 1948 F-1, Bronco, Courier, Ranchero, and Econoline.

High and Mighty Dec 20 2021 SUVs have taken over America's roads. Ad campaigns promote them as safer and "greener" than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In *High and Mighty*, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect--for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of *Unsafe at Any Speed* and *Fast Food Nation*, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not.

Duty to Investigate Aug 04 2020 As a successful trial lawyer, Mike Beck uses his personality and his skill with the letter of the law to win in a courtroom. As a Marine Reservist ordered to Iraq on an unexpected deployment, he finds himself in a different world where the law of war often conflicts with common sense and his own feel for what's right and what's wrong. When an embedded female correspondent reveals what appears to be an illegal killing of Iraqi civilians by a U.S. Marine during the battle for Fallujah, Beck finds himself faced with a case that challenges both his legal skills and his conviction that something is very wrong with what seems to be a clear violation of the law of land warfare. Devoted to finding the truth about an ugly incident and keeping an innocent Marine from being convicted in a court-martial, Mike Beck defies orders, purloins evidence, and leads a combat team that must fight their way through a fanatical enemy force to investigate the scene of the alleged crime. Along the way as he battles his conscience, command influence, and a media giant clamoring for his head, Mike Beck finds a lot of truth about the case, about the brutal enemy in Iraq, about the nature of a very nasty war, about the Marines risking their lives in a confusing combat situation—and about himself as a Marine, a lawyer, and a man. “A timely page-turner about war, honor, love, and Iraq justice told by a true Marine—Hooah!” Eugene Sullivan, Chief Judge (ret), U.S. Court of Appeals (Armed Forces) Author of *The Majority Rules* and *The Report to the Judiciary Stone*, a former Marine himself, blurs the lines between the good guys and the bad guys and shows us that in war, not everything and everyone is as they seem at first glance. His battle scenes are written from the perspective of a true soldier and are gripping and at times heart-breaking. Stone's story is intriguing, action-packed—and hints at more to come.

Ford, Regaining Their Competitive Edge Jan 09 2021 This project contains a look into the manufacturing company of Ford Motor Company. Research was done about how the company runs business, both globally and domestically. In this report, the company's mission, goals, strategies, product and service portfolios, market share and profit performance, technology and employment information are outlined. Key successes

and weakness failures are also discussed in detail. Information about Ford's use of computer systems and an information model for the company is also included. The information model displays Ford's Work System, showing which components of the Work Organization, Control System, Industrial Relations and Human Resources Practices Ford implements. The Business Organization, with Ford's Business Strategy and Enterprise Organization is also part of the model. At the end of the report, self-evaluations by team members and references can be found. Ford Motor Company is currently trying to increase its global market share in automobile sales while facing slumping market share numbers in the United States. This report examines the Ford company characteristics and how the company uses information systems in the business climate. To reduce costs and increase knowledge of a region Ford uses small ERP systems that are less expensive and faster to implement than the larger ERP systems. Failure to obtain a larger market share in foreign markets has hurt the company. The proper use of information systems by Ford will increase their ability to maintain a successful business in future years locally and globally.

The focus is on teaching through the realistic problems, complete with ethical difficulties embedded into the fact patterns. The presentation is lively and colloquial. Explanatory text throughout makes bankruptcy law accessible to students and easier to teach. Because it divides the subject between consumer and business bankruptcy, professors can select the depth of coverage for each subject in designing a two-, three-, or four-credit class. The authors—Senator Elizabeth Warren, Congresswoman Katie Porter, and Professors Pottow (Michigan) and Westbrook (Texas)—are among the most prominent in the field.
