**Out** 22 2021 The prominence of space law has grown in recent years as private companies rapidly expand their spaceflight capabilities and open new markets in outer space. With this transition, the space industry has many new opportunities and must also confront increased risks. Without laws that govern spaceflight activities minimize the risk to people and property in outer space and on the ground. This book examines some of these laws and subsequent court cases.

**Feb** 11 2021 Two worlds that in academia remain largely separated are brought together in this book in a unique way; the world of food safety law and the world of the right. Key features include: (1) an up to date reflection of the status quo on food law related research written by who are at the forefront of research in the functional field of food law; (2) a collection of contributions from all continents of the world; and (3) covering human rights, international law, European law and non-European law dimensions. This book is written as a Liber Amicorum in honour of Professor Bernd van Oortmeulen, who was the Chair of Law and Governance at Wageningen University (2001-2018), and established food law as an academic discipline in the Netherlands. In 29 contributions the functional field of food law is discussed. The contributors are researchers and academics from around the globe, and are above all former colleagues who have worked with Bernd during his time at Wageningen University. In this book, they share their insights, research and thoughts on this fascinating and highly relevant field.

**Data** Aug 08 2020 This book explores the phenomenon of data – big and small – in the contemporary digital, informatic and legal-bureaucratic context. Challenging the way in which legal interest in data has focused on rights and privacy concerns, this book examines the contestable, multivocal and multifaceted figure of the contemporary data subject. The book analyses "data" and "personal data" as contemporary phenomena and addresses the data realms, such as stores, institutions, systems and networks, out of which they emerge. It interrogates the role of law, regulation and governance in structuring both formal and informal definitions of the data subject, and disciplining data subjects through compliance with normative standards of conduct. Focusing on the 'personal' in and of data, the book pursues a re-evaluation of the nature, role and place of the data subject qua legal subject in on and offline societies: one that does not begin and end with the inviolability of individual rights but returns to more fundamental legal principles suited to consideration of personhood, such as stewardship, trust, property and contract. The book's concern with the production

abuse and alienation of personal data within the context of contemporary communicative capitalism will appeal to scholars and students of law, science and technology studies, and sociology; as well as those with broader political interests in this area.

Research from Archival Case Records Feb 23 2022 Legal history studies generally focus mainly on codified law, without attention to actual practice, and on the past, without relating it to the present. Research from Archival Case Records starts from legal practice instead and links the past to the present.

Intimations of Global Law Mar 27 2022 "This is a book about how we might fruitfully think about global law. Few terms are more topical in the transnational legal literature. Yet there has been little serious discussion and little agreement where there has been discussion - on what is meant by 'global law', if, indeed, it means anything of note at all. In what follows, I suggest that we can nonetheless arrive at a core sense of global law as an emergent idea and practice"--

Technology Aug 20 2021 Placing contemporary technological developments in their historical context, this book argues for the importance of law in their regulation. Technological developments are focused upon overcoming physical and human constraints. There are no normative constraints inherent in the quest for ongoing and future technological development. In contrast, law proffers an essential normative constraint. Just because we can do something, does not mean that we should. Through the application of critical theory and jurisprudence to pro-actively engage with technology, this book demonstrates why legal theory should be prioritised in emerging technological futures. This book articulates classic skills and values such as ethics and justice to ensure that future and ongoing legal engagements with socio-technological developments are tempered by legal normative constraints. Encouraging them to foreground questions of justice and equity when thinking about law and technology, the book addresses law students and teachers, lawyers and legal thinkers concerned with the proliferation of technology in our lives.

Television and the Legal System Jan 13 2021 American legal television series have long informed viewers - and fostered myths - about the legal system in the US. Villez examines this genre from the 1940s to the present and contrasts American legal shows with those in France, where the same genre offers a strikingly different representation of justice.

Your Brain and Law School Apr 15 2021 Based on the latest research, this entertaining, practical guide offers law students a formula for success in school, on the bar exam, and as a practicing attorney. Mastering the law, either as a law student or in practice, becomes much easier if one has a working knowledge of the brain and its habits. Before you can learn to think like a lawyer, you have to have some idea about how the brain thinks. The first part of this book translates the technical research, explaining learning strategies that work for the brain in law school specifically, and calling out other tactics that are useless (though often popular lures for the brain-misinformed). This book is unique in explaining the science behind the advice and will save you from pursuing tempting shortcuts that will take you in the wrong direction. The second part explores the brain's decision-making processes and cognitive biases. These biases affect the ability to persuade, a necessary skill of a successful lawyer. The book talks about the art and science of framing, the seductive lure of the confirmation bias, and egocentric biases, and the egocentricity of the availability bias. This book uses easily recognizable examples from both law and life to illustrate the potential of these biases to draw humans to mistaken judgments. Understanding these biases is critical to becoming a successful attorney and gaining proficiency in fashioning arguments that appeal to the sometimes quirky processing of the human brain. This book is part of the Context and Practice Series, edited by Michael Hunter Schwartz, Professor of Law and Dean of the McGeorge School of Law, University of the Pacific. Your Brain and Law School was a finalist in the Best Published Self-Help and Psychology category of the 2015 San Diego Book Awards.

Human Rights and Private International Law Jan 25 2022 This text tackles the interaction of human rights law with private international law. It provides an essential resource for practitioners and academics in the field.

Obligations Jun 17 2021 Obligations: New Trajectories in Law provides a critical analysis of the role of obligations in contemporary legal and social practices. As rights have become the preeminent feature of modern political and legal discourse, the work of obligations has been overshadowed. Questioning and correcting this dominant image of our time, this book brings obligations back into view in a way that

with the realities of contemporary social life. Following a historical account of the changing place and priorities of obligations in modernity, the book analyses how obligations and practices of obedience are understood and how law sustains conditions of inequality. But it also explores the enduring role of obligations in furthering individual and collective well-being, highlighting their significance in practices that prioritize human and environmental needs, common goods, and solidarity. In doing so, it also offers an alternative and cogent assessment of the force, and the potential, of obligations in contemporary societies. This original jurisprudential contribution will appeal to an academic and student readership in law, politics, and the social sciences.

**Entangled Legalities Beyond the State** Oct 7 2020 Law is usually understood as an orderly, coherent system, but this volume shows that it is often better understood as an entangled web. Bringing together eminent contributors from law, political science, sociology, anthropology, history and political theory, it also shows that entanglement has been characteristic of law for much of its history. The book shifts the focus to the spaces in which actors create connections and distance between different legalities in domestic, transnational and international law. It examines a wide range of issue areas, from the relationship of state and indigenous law to the regulation of global financial markets, from corporate social responsibility to struggles over human rights. The book uses these empirical insights to inform new theoretical approaches to law, and by placing entanglements between norms from different origins at the centre of the study of law, it opens up new paths for future legal research. This title is also available as Open Access.

**The Concept of Law** Dec 04 2022 Fifty years on from its original publication, HLA Hart's *The Concept of Law* is widely recognized as the most important work of legal philosophy published in the twentieth century. It remains the starting point for most students coming to the subject for the first time. In this third edition, Green provides a new introduction that sets the book in the context of subsequent developments in social and political philosophy, clarifying misunderstandings of Hart's project and highlighting central tensions and problems in the work.

New York University School of Law Series in Legal History 2023

Transparency Jan 01 2020 This book critiques the contemporary recourse to transparency in law and policy. This is, ostensibly, the information age. At the heart of the societal shift toward digitalisation is the concept of transparency and the liberalisation of information and data. Yet, with the recent rise of concerns such as 'fake news', post-truth and misinformation, where the policy responses to all these phenomena has been a call for even greater transparency, it becomes imperative to critically reflect on what this dominant idea means, to whom it serves, and what the effects are of its power. In response, this book provides the first sustained analysis of the concept of transparency in law and policy. It offers a concise overview of transparency in law and policy around the world, and critiques how this concept works discursively to delimit other forms of governance, ways of knowing and other realities. It draws on the work of Michel Foucault on discourse, archaeology and genealogy, together with later Foucaultian scholars, including Gayatri Chakravorty Spivak and Judith Butler, as a theoretical framework for challenging and thinking anew the history and understanding of what has become one of the most popular buzzwords of 21st century law and governance. At the intersection of law and governance, this book will be of considerable interest to those working in these fields; but also to those working in other interdisciplinary areas, including society and technology, the digital humanities, technology law and policy, global law and policy, as well as the surveillance society.

A View From a Hill (Fantasy and Horror Classics) 20 2021 M. R. James was born in Kent, England in 1862. James came to writing fiction relatively late, not publishing his first collection of short stories - *Stories of an Antiquary* (1904) - until the age of 42. Modern scholars now see James as having redefined the ghost story for the 20th century and he is seen as the founder of the 'antiquarian ghost story'. We are republishing these classic works in affordable, high quality, modern editions with a brand new introductory biography of the author.

**Personal Identity and the European Court of Human Rights** Feb 06 2023 "In this new and burgeoning field in legal and human rights thought, this edited collection explores, by reference to applied philosophy and law, how the European Court of Human Rights (ECtHR) has developed and presented a right to personal identity, largely through interpretation of Article 8 of the European Convention on Human Rights. Divided into three parts, the collection interrogates: firstly, the construction of personal identity rights at the ECtHR; secondly, whose identity rights are protected; and thirdly, the limits of identity rights. The collection is part of the Routledge Studies in Law and Humanity series. Contributions from nine leading and emerging legal scholars from the UK, Ireland and continental Europe explore how the right has developed, rights to identity and marriage, LGBTI+, persons with disabilities, religious and cultural issues and critical perspectives on the social construction and framing of the right. The collection is primarily aimed at scholars and advanced law students, particularly of human rights law and its theory, Jurisprudence and Philosophy of Law, and those interested in ECtHR jurisprudence, and those interested in the connection between theories of inclusion, belonging and rights, including human rights lawyers"--

**Sentencing** Jul 19 2021 This book examines the process and purpose of sentencing in the criminal justice system, beyond the confines of its legalistic aspects. Sentencing is the process that concludes any criminal trial that ends with the defendant being convicted, and any hearing in which a defendant pleads guilty. Those convicted of crime have been subject to sentencing as the method of imposing a punishment for their crime since the earliest existence of anything we would recognise as a criminal justice system. Yet the rationale behind sentencing, and the process by which it happens, has long been viewed through a traditional legalistic lens. In contrast, this book considers not just the process by which a Judge arrives at a numerical sentence or term in custody or the amount of a fine, but the wider meanings and effects of sentencing, as seen through the lens of various ideas of social justice. The book will appeal to students, academics, and legal practitioners who wish to consider a different perspective on the well-known and well-researched, but often shifting, area of sentencing.

Community Justice Centres Apr 03 2020 This book examines the phenomenon of Community Justice Centres and their potential to transform the justice landscape by tackling the underlying causes of crime. From drug recidivism, addiction, family violence, overflowing courtrooms, crippling prison spending and extreme rates of incarceration, the criminal justice system is in crisis. Community Justice Centres seek to combat this by tackling the underlying causes of crime in a particular neighbourhood and working with local people to redesign the experience of justice and enhance the notion of community. A Community Justice Centre is a court which works with an interdisciplinary team to address the causes of criminality such as drug use, cognitive impairment, mental illness, poverty, abuse and intergenerational trauma. The community thus becomes a key agent of change, partnering with the Centre to tackle local issues and improve safety and community cohesion. This book, based on research into this innovative justice model, examines case studies from around the world, the challenges presented by the model and the potential for bringing its learning into the mainstream. This book will appeal to academics in law and criminology as well as psychology; it will be of considerable interest to people working in the criminal justice system, including the police, government policy advisers, psychologists and social workers.
