2020 You can almost hear the lion's roar: Announcing an ingeniously fun new idea in paper craft for kids. Think of it as the anti-origami--instead of complicated folds leading to an abstract result, Paperfold Wild Animals uses a punch-out design, two simple types of folds (the classics, "mountain" and "valley"), and beautiful full-color illustration to let

kids ages seven and up construct creatures that are satisfying to make and a real spark to the imagination. And they're especially good for parents, with no scissors required, no glue or tape needed, and no mess to clean up afterward. Conceived, designed, and illustrated by Megan Montague Cash, Paperfold Wild Animals gives kids everything they need to make ten favorite animals from around the world: lion, giraffe, elephant, tortoise, ibex, orangutan, wolf, kangaroo, crocodile, and bear. But not just a wolf--a howling wolf. Not just an ibex--an ibex with its head down and horns up, ready

to charge. Not just a bear, but a bear about to enjoy a meal of the fresh salmon it just scooped out of the water. Lifelike in how they're shaped and posed, illustrated with realistic markings and graced with expressive features--even a strong sense of personality--they will inspire hours of imaginative play. And the book itself has a special design--it opens out like an accordion that includes punch-out pages, easy directions, and fact cards about every animal.

### **The Book of Mindful Origami**

Jul 17 2021 Every day millions of us sit in front of a computer screen tapping away at a

keyboard, mostly writing virtual notes to unseen correspondents. By contrast, an origami project is a chance to be creative and make something tangible; in fact, turning a piece of paper into a three-dimensional sculpture is a meditative journey that instills in us a sense of pride, competence, and accomplishment. As we fold the paper, the focus required and the tactile connection help free our minds to roam, creating the opportunity for a moment of self-reflection, for true presence of mind.

*The Art of the Fold*  
Dec 30 2019 "The influential artist Hedi Kyle and renowned architecture

graduate Ulla Warchol shows you how to create their unique designs using folding techniques. From creating flag books and fishbones, to blizzards and nesting boxes, you'll gain an invaluable insight into the work of two skilled artists with this fun read! With the help of their thorough instructions and simple illustrations, you'll be on your way to becoming a pro paper crafter in no time at all" - Sew magazine "A wonderful insight into the work of a truly skilled artist" - PaperCrafter

The renowned and influential book artist Hedi Kyle shows you step-by-step how to create her unique

designs using folding techniques in *The Art of the Fold*. Bookbinding and paper craft projects include flag books, blizzard books, the fishbone fold, and nesting boxes. Written by the doyenne of artists' books, Hedi Kyle, *The Art of the Fold* is a wonderful insight into the work of a truly skilled artist. Hedi will show you how to bind a book and fold paper to create over 35 of her cut-fold book designs. The book is beautifully illustrated with Hedi's finished works of art. An excerpt from the book: 'I can still remember the thrill I experienced when my first folded book structure emerged from my fingers -

how eager I was to explore its possibilities and to share it with whoever was interested. The Flag Book, as I now call it, is a simple accordion and has interlocking pages oriented in opposite directions. Little did I know that this simple structure would have legs and be the catalyst for the next forty-plus years of thinking about and making books. The common perception of the book today is fairly straightforward: a series of pages organized around a spine and protected on either side by two covers. This format allows for easy access, storage and retrieval of information. Yet

what happens when the book is stripped away of centuries of preconceptions and is allowed to reveal something else: playfulness, utility, invention? Expanding the notion of the book is what the structures in the following chapters of *The Art of the Fold* attempt to do. Exploring its tactile, sculptural form, primarily through folding methods, the book as a structural object is celebrated while content is considered in a new and unconventional way. My range in this medium has always been broad. In part this is due to my introduction to the world of bookbinding and some chance encounters. In the

1970s in New York City, the art and craft of hand bookbinding and papermaking were experiencing an unprecedented revival. I was fortunate to arrive in the city at just this moment. With an art-school background and an impulse to make things, I was naturally drawn to pursue this new opportunity. The Center for Book Arts, the famous forerunner of so many centers yet to come, was located in a small storefront just down the street from where I lived on the Lower East Side of Manhattan. Under the direction of founder Richard Minsky, it had a radical mission: to push concept, materials, printing

and making of artist books in a new direction. When Richard dared me to teach at the Center one evening a week, I was hooked. My career as a book conservator and a book artist has now spanned over 45 years. As head conservator at the American Philosophical Society in Philadelphia, I've had the opportunity to handle some of the rarest volumes and manuscripts in the world. I have also dealt with decrepit books, torn maps and countless curiosities discovered in stacks and archives. All were endless sources for ideas and provided a springboard for a departure from

tradition. Leading book-arts workshops around the world and a 25 year tenure teaching in the graduate program for Book Arts and Printmaking at the University of the Arts in Philadelphia have shown me, in retrospect, that the more I taught, t

**Under the Sea Origami** Nov 20

2021 From a

slithering electric eel to a ferocious barracuda, Duy Nguyen shows you simple paper folding techniques for crafting extraordinary sea creatures. These striking projects, specially designed for Under the Sea Origami, are fun to make using Nguyen's instructions. You don't have to dive under the sea to spot dolphins because these mammals enjoy jumping out of the water. Your origami model will emulate this graceful leaping motion once you create its intricately-folded arched back, fins, and snout. With a long, wide body and whip-like tail, the stingray is a most distinctive-looking

fish. It appears to be in mid-flight even though it's nimbly swimming in the water. The hammerhead shark is easily recognized by the shape of its skull. A large tail, made by using mountain and valley folds, rises dramatically to give the hammerhead a great silhouette. The origami blue shark, on the other hand, will attract attention because of its large gaping mouth! To complete the swordfish, you'll need to attach two pieces of folded paper together. Anyone might be frightened by the appearance of a creature that has a swordlike beak and pointy head, unless it was made of paper like this one is! The squid is as

fun to create as the swordfish. Its creepy tentacles will take shape after you cut the valley-folded tail into layers. You will find that these unusual origami projects are among the most original ever designed. Book jacket.

Approximately 140 spectacular works by more than 50

artists from 15 different countries demonstrate that origami has become such a refined form of artistic, scientific, and spiritual expression there is almost nothing a square sheet of paper cannot be folded into. The works range from lifelike and representational to mathematical and computer-generated to lyrical and abstract to social and political. The exhibition also includes origami-related woodblock prints, murals, books, wall projections, videos, and a unique interactive origami-making component. The exhibition is organized into 4 sections: 1) The History of Origami;

2) Animals and Angels: Representations of Real and Imagined Realms; 3) Angles and Abstractions: Geometric Forms and Conceptual Constructions; and 4) Inspirational Origami: Impact on Science, Industry, Fashion, and Beyond. *Folding Paper* was developed by independent curator, author, and educator Meher McArthur, former curator of East Asian Art at Pacific Asia Museum in Pasadena, California. The exhibition will debut in Los Angeles at the Japanese American National Museum in March 2012. The award-winning documentary film, *Between the Folds*,

features 18 of the artists in the exhibition and would correlate wonderfully with exhibition programming. Folding Paper is a dynamic exhibition with a compelling message: origami is an international fine art form that is also at the cutting edge of math, science, and design. The exhibition was generously supported by the E. Rhodes & Leona B. Carpenter Foundation.
