The Andromeda Evolution Jun 15 2021 NEW YORK TIMES BESTSELLER Fifty years after The Andromeda Strain made Michael Crichton a household name—and spawned a new genre, the technothriller—the threat returns, in a gripping sequel that is terrifyingly realistic and resonant. The Evolution is Coming. In 1967, an extraterrestrial microbe came crashing down to Earth and nearly ended the human race. Accidental exposure to the particle—designated The Andromeda Strain—killed every resident of the town of Piedmont, Arizona, save for an elderly man and an infant boy. Over the next

five days, a team of top scientists assigned to Project Wildfire worked valiantly to save the world from an epidemic of unimaginable proportions. In the moments before a catastrophic nuclear detonation, they succeeded. In the ensuing decades, research on the microparticle continued. And the world thought it was safe... Deep inside Fairchild Air Force Base, Project Eternal Vigilance has continued to watch and wait for the Andromeda Strain to reappear. On the verge of being shut down, the project has registered no activity—until now. A Brazilian terrain-mapping drone has detected a bizarre anomaly of otherworldly matter in the middle of the jungle, and, worse yet, the tell-tale chemical signature of the deadly microparticle. With this shocking discovery, the next-generation Project Wildfire is activated, and a diverse team of experts hailing from all over the world is dispatched to investigate the potentially apocalyptic threat. But the microbe is growing—evolving. And if the Wildfire team can't reach the quarantine zone, enter the anomaly, and figure out how to stop it, this new Andromeda Evolution will annihilate all life as we know it.

The Centaur's Wife Jan 29 2020 Amanda Leduc's brilliant new novel, woven with fairy tales of her own devising and replete with both catastrophe and magic, is a vision of what happens when we ignore the natural world and the darker parts of our own natures. Heather is sleeping peacefully after the birth of her twin daughters when the sound of the world ending jolts her awake. Stumbling outside with her babies and her new husband, Brendan, she finds that their city has been destroyed by falling meteors and that her little family are among only a few who survived. But the mountain that looms over the city is still green--somehow it has been spared the destruction that has brought humanity to the brink of extinction. Heather is one of the few who know the mountain, a place city-dwellers have always been forbidden to go. Her dad took her up the mountain when she was a child on a misguided quest to heal her legs, damaged at birth. The tragedy that resulted has shaped her life,

bringing her both great sorrow and an undying connection to the deep magic of the mountain, made real by the beings she and her dad encountered that day: Estajfan, a centaur born of sorrow and of an ancient, impossible love, and his two siblings, marooned between the magical and the human world. Even as those in the city around her--led by Tasha, a charismatic doctor who fled to the city from the coast with her wife and other refugees--struggle to keep everyone alive, Heather constantly looks to the mountain, drawn by love, by fear, by the desire for rescue. She is torn in two by her awareness of what unleashed the meteor shower and what is coming for the few survivors, once the green and living earth makes a final reckoning of the usefulness of human life and finds it wanting. At times devastating, but ultimately redemptive, Amanda Leduc's fable for our uncertain times reminds us that the most important things in life aren't things at all, but rather the people we want by our side at the end of the world.

In this new edition, Michael Wood vividly conjures some of the most important people in British history such as Hadrian, a Libyan refugee from the Arab conquests and arguably the most important person of African origin in British history, to Queen Boadicea, the leader of a terrible war of resistance against the Romans. Here too, warts and all, are the Saxon, Viking and Norman kings who laid the political foundations of England: Offa of Mercia, Alfred

the Great, Athelstan, and William the Conqueror, whose victory at Hastings in 1066 marked the end of Anglo-Saxon England. Reflecting the latest historical, textual and archaeological research, this revised and updated edition of Michael Wood's classic book overturns preconceptions of the Dark Ages as a shadowy and brutal era, showing them to be a richly exciting and formative period in the history of Britain.
