What is the relationship between education and natural disasters? Can education play a role in ameliorating and mitigating them, preparing people in how to respond, and even helping to prevent them? If so, how? Drawing on research carried out in a number of different countries, including Australia, China, India, Japan, the UK and the USA, the contributors consider the role of education in relation to natural disasters. The case studies expand conceptual and empirical understandings of the understudied relationship between education and natural disasters and uncover the potential and the limitations of education for mitigating, responding to, and potentially preventing, natural disasters. The contributors also consider the extent to which so-called natural disasters, such as mudslides caused by deforestation and flooding areas built on known flood plains, are linked to human behaviour and how education can impact on these. In *The Impossible Will Take a Little While*, a phrase borrowed from Billie Holliday, the editor of *Soul of a Citizen* brings together fifty stories and essays that range across nations, eras, wars, and political movements. Danusha Goska, an Indiana activist with a paralyzing physical disability, writes about overcoming political immobilization, drawing on her history with the Peace Corps and Mother Teresa. Vaclav Havel, the former president of the Czech Republic, finds value in seemingly doomed or futile actions taken by oppressed peoples. Rosemarie Freeney Harding recalls the music that sustained the civil rights movement, and Paxus Calta-Star recounts the powerful vignette of an 18-year-old who launched the overthrow of Bulgaria's dictatorship. Many of the essays are new, others classic works that continue to inspire. Together, these writers explore a path of heartfelt community involvement that leads beyond despair to compassion and hope. The voices collected in *The Impossible Will Take a Little*

This edited book examines the significance of intangible cultural heritage to local communities and the state in Hong Kong and China. Through ethnographic studies, the various chapters in this edited book argue for the role of the local community in the creation and conservation of the intangible cultural heritage and traditions. Irrespective of whether they are selected and listed as regional, national or UNESCO intangible cultural heritage, they are part of the living traditions unique to that particular local community. This edited book argues that there are threefold significance of intangible cultural heritage to the local community and the state. First, intangible cultural heritage is seen as a social prestige. Second, it acts as socio-cultural and economic capital for members of the community to tap into to ensure socio-cultural and economic sustainability of the community. Finally, the intangible cultural heritage serves as a depository of the collective memories of the community, linking the past to the present and the future.
