JavaScript & DHTML Cookbook Dec 30 2019
On numerous online forums for JavaScript and DHTML, the majority of questions begin with "How do I...?" This new Cookbook provides the answers. After reading thousands of forum threads over the years, author and scripting pioneer Danny Goodman has compiled a list of problems that frequently vex scripters of various experience levels. He has now applied state-of-the-art ECMA and W3C DOM standards and used best practices to create this extensive collection of practical recipes that can bring your web pages to life. The JavaScript & DHTML Cookbook is all about adding value to the content of a web page. The book focuses on practical and sensible applications of scripting, rather than flying images and gratuitous color changes. For every problem Goodman addresses, there's a solution or "recipe"--a focused piece of code that web developers can insert directly into their applications. Yet, rather than just cut-and-paste code, you also get explanations of how and why the code works, so you can learn to adapt the problem-solving techniques to your designs. The recipes range from simple tasks, such as manipulating strings and validating dates in JavaScript, to entire libraries that demonstrate complex tasks, such as cross-browser positioning of HTML elements and sorting tables. This book contains over 150 recipes on the following topics:
Working with interactive forms and style sheets
Presenting user-friendly page navigation
Creating dynamic content
Producing visual effects for stationary content
Positioning HTML elements
Managing browser windows and multiple frames
This book is the ideal companion to O'Reilly's JavaScript: The Definitive Guide and Dynamic HTML: The Definitive Reference. If you own either of these books, the JavaScript & DHTML Cookbook is a must.

Customizing and Extending IBM Content Navigator May 07 2023 IBM® Content Navigator provides a unified user interface for your Enterprise Content Management (ECM) solutions. It also provides a robust development platform so you can build customized user interface and applications to deliver value and an intelligent, business-centric experience. This IBM Redbooks® publication guides you through the Content Navigator platform, its architecture, and the available programming interfaces. It describes how you can configure and customize the user interface with the administration tools provided, and how you can customize and extend Content Navigator using available development options with sample code. Specifically, the book shows how to set up a development environment, and develop plug-ins that add an action, service, and feature to the user interface. Customization topics include implementing request and response filters, external data services (EDS), creating custom step processors, and using Content Navigator widgets in other applications. This book also covers mobile development, viewer customization, component deployment, and debugging and troubleshooting. This book is intended for IT architects, application designers

and developers working with IBM Content Navigator and IBM ECM products. It offers a high-level description of how to extend and customize IBM Content Navigator and also more technical details of how to do implementations with sample code.

James Dec 22 2021 Over 2.5 million LifeChange studies sold Growing in God takes work. We don't wake up wise, and faith is not a reflex. James, a pastor in biblical times, recognized this as he wrote the book of James. His letter confronts the confidence we place in our own capacity for wisdom and faith. He challenges us to instead receive God's wisdom—freely given and available to all—to fill in what we lack. Discover the practices of faith and wisdom that will help you grow more in Christ's character. In this study you will find:
12 lesson to help lead you through the book of James
Wide margins and extra space for your reflections
Discussion questions for group study
Thought-provoking reflection questions and prompts
Notes for further study
Applications to help you go deeper
Helpful excerpts on the historical context
LifeChange Bible studies offer a transformative encounter with each book of the Bible. Designed to help you discover and rediscover insightful and challenging truths in Scripture, each book is ideal for group or personal use.

IBM Enterprise Content Management Mobile Application Implementation Nov 08 2020 IBM® Enterprise Content Management (ECM) software enables the world's top companies to make better decisions, faster. By controlling content, companies can use industry-specific solutions to capture, manage, and share information. Successful organizations understand that business content matters more than ever as mobile, social, and cloud technologies transform their business models. This IBM Redpaper™ publication introduces the mobile functionality offered in IBM Enterprise Content Management products: IBM Content Navigator, IBM Case manager, and IBM Datacap Mobile. This paper covers key security considerations for mobile application deployments. Many organizations are concerned about the usage of mobile devices for business use and the risk to enterprise data leakage. Mobile technology and mobile security practices have evolved to provide enterprises with all the tools they need to properly secure and manage mobile deployments. As with any

best practices or tools, organizations must adopt and implement them for mobile solutions and mobile security to be effective. This paper provides the reader with a deeper look into each one of the IBM ECM mobile offerings and a full description of their current capabilities; using an end-to-end sample scenario covers a commercial real estate loan process. This paper is intended for both executives and technical staffs who are interested in obtaining a quick understanding of the mobile capabilities offered in the IBM Content Management portfolio and the application development functionality.

The Navigator Mar 01 2020 Years ago, an ancient Phoenician statue known as the Navigator was stolen from the Baghdad Museum, and there are men who would do anything to get their hands on it. The first victim is a crooked antiquities dealer, murdered in cold blood. Their second very nearly is a UN investigator who, were it not for the timely

assistance of Austin and Zavala, would now be at the bottom of a very watery grave. What's so special about this statue? Austin wonders. The search for answers will take the NUMA team on an astonishing odyssey through time and space, one that encompasses no less than the lost treasures of King Solomon, a mysterious packet of documents personally encoded by Thomas Jefferson, and a top secret scientific project that could change the world forever. And that's before the surprises really begin . . . Visit clivecussler.com.au for more

Building IBM Enterprise Content Management Solutions From End to End Sep 30 2022 IBM® Enterprise Content Management (ECM) solutions provide efficient and effective ways to capture content, manage the content and business processes, discover insights from the content, and derive actions to improve business processes, products, and services. This IBM Redbooks® publication introduces and highlights some of the IBM ECM products that can be implemented and integrated together to create end-to-end ECM solutions: IBM Case Manager IBM Datacap IBM Content Manager OnDemand IBM Enterprise Records IBM Watson™ Content Analytics IBM Content Classification For each product involved in the ECM solution, this IBM Redbooks publication briefly describes what it is, its functions and capabilities, and provides step-by-step procedures for installing, configuring, and implementing it. In addition, we provide procedures for integrating these products together to create an end-to-end ECM solution to achieve the overall solution objectives. Not all of the products are required to be integrated into an ECM solution. Depending on your business requirements, you can choose a subset of these products to be built into your ECM solutions. This book serves as a hands-on learning guide for information technology (IT) specialists who plan to build ECM solutions from end-to-end, for a proof of concept (PoC) environment, or for a proof of technology environment. For implementing a production-strength ECM solution, also refer to IBM Knowledge Center, IBM Redbooks publications, and IBM Software Services.

Mathematics for the Mariner Aug 06 2020

Whereas numerous tomes of comprehensive studies of navigation and related subjects are readily available for the professional navigator, there is dearth of publications suitable for the amateur navigator in a "how-to" form.

Furthermore, the appearance of relatively inexpensive electronic devices, such as the GPS, has lured would-be navigators away from the traditional methods of navigation, in spite of the warnings offered by the companies producing these devices. Thus they overlook the "sine qua non" of good navigation, the determination of the current velocity, that is the set and drift. Once determined this component of the navigational triangle makes precise navigation a snap, whereas without it there is only uncertainty. Most students are turned off by the need to acquire a practical application of basic formulae employing basic trigonometry and later spherical trigonometry, methods which have evolved over the centuries from the beginning of the Age of Exploration in the early 1400's to modern days. In this text we develop the knowledge and application of these mathematical processes in such a way as to reassure the student that these techniques are not beyond his capabilities.

The Navigator Feb 21 2022

The American Practical Navigator Feb 09 2021 The American Practical Navigator, first published in 1802, was billed as the "epitome of navigation" by its original author, Nathaniel Bowditch, an early American mathematician who is often considered the founder of modern maritime navigation. The text, often colloquially referred to simply as "Bowditch," has evolved with the advances in navigation practices since that first issue and continues to serve as a valuable reference for marine navigation in the modern day. In the more than 210 years since Bowditch first published it, there have been an estimated million copies in print over the course of more than fifty editions. This latest edition—fully updated by the U.S. government to reorganize the topics, delete obsolete text, and incorporate the extensive changes in navigation that have occurred in the electronic age—remains popular with sailors of all types, is carried onboard every commissioned U.S. Navy vessel, and belongs in every navigator's library. The American Practical Navigator describes in detail the principles and factors of navigation, including piloting, electronic navigation, celestial navigation, mathematics, safety, oceanography, and marine meteorology. It also contains a maritime glossary and dozens tables used in typical navigational calculations and solutions, including the formulas used to derive the tabular data. "Bowditch" is a must-have book for every mariner.

The Innovation Navigator Jan 03 2023

Innovation is a top strategic priority for firms across all industries. In *The Innovation Navigator*, Tucker J. Marion and Sebastian K. Fixson explore four innovation archetypes or modes - "specialist," "venture," "community," and "network" - which feature prominently in the expanding innovation landscape. Specialists employ technologies to achieve entirely new solutions and superior product performance. New corporate ventures lower the barriers for employees to self-select into entrepreneurial projects, while reducing the constraints of bureaucracy. The community brings new sources of knowledge by expanding past the firm's boundaries, dramatically increasing the number of participants. The network creates partnerships and ecosystems that create innovations that could not be developed by individual companies alone. *The Innovation Navigator* guides the reader in exploring and exploiting these different modes of innovation. Individual chapters provide key insights into the inherent opportunities and challenges from a number of vantage points: from the impact on organizational resources to the role of incentives. The book also provides a framework for how firms can leverage dynamic mode shifts and multimode strategies. Firms across the industrial spectrum are profiled, from new additive manufacturing companies such as Formlabs, community-based solution providers like Forth, to traditional firms exploring new modes like GE Appliances and their FirstBuild initiative. *The Innovation Navigator* will assist executives in building the capabilities for peak performance in this new innovation landscape. *The Navigator* May 27 2022

The Fructose Navigator Apr 13 2021 Do you suffer from fructose intolerance? To avoid pain, diarrhea, and flatulence, use *The Fructose Navigator* and find out, how much you can stomach and by which food combinations you can increase that amount for over 1,000 foods. By including patients in the development, the explanations, tools, and recipes are easy to understand and apply.

Celestial for the Cruising Navigator Jan 29 2020 The book presents a comprehensive treatment of celestial navigation based upon the essential foundations of nautical astronomy and spherical trigonometry. Beginning with a discussion of position and time, it proceeds systematically to show how sextant observations coupled with time provide indispensable checks and information on course, distance, and position. Emphasizing computational rather than tabular solutions to sight reduction problems, while basic trigonometric formulae are developed, all computation is done with the most inexpensive hand calculator. The author also stresses the backgrounds of nautical astronomy, beyond the perfunctory routines of sight reduction. The reader, in other words, learns not only what, but why. While the treatment is directed toward the cruising sailor who wishes to plan and undertake oceanic voyages, it is sufficiently comprehensive to fulfill the needs of the

professional mariner.

The Biometric Industry Report - Forecasts and Analysis to 2006 Apr 25 2022 Biometrics

- the physiological and/or behavioural characteristics that can be used to verify the identity of an individual - are no longer just being used in high security locations; they are now in use in major, mainstream government and commercial applications. Since September 11, the heightened awareness of security issues is driving forward the adoption of biometrics within numerous application environments. Coupled with a dramatic decrease in the price of such systems and the formulation of comprehensive industry standards, the market looks set for rapid growth over the next 5 years. The second edition of *The Biometric Industry Report - Forecasts and Analysis to 2006* examines the current use and future growth of biometrics. It analyses the trends in markets, technologies and industry structure and profiles the major players. The report provides key market statistics and forecasts essential for companies to plot their future growth strategies.
