Laogai--the Chinese Gulag Aug 10 2021 In this work, the author reveals the hidden world of the "laogaidui" - the PRC's labour reform camps. The author, a political prisoner for 19 years, takes the reader through the harsh reality found in the camps, describing their ideological origins, complex structures and living conditions. What makes the PRC's "laogaidui" unique, according to Wu, is the essential contribution to China's GNP of the commodities produced by the prisoners and the camps' concomitant indispensability to the nation's economic health.

Inside Rebellion Jun 08 2021 Some rebel groups abuse noncombatant populations, while others exhibit restraint. Insurgent leaders in some countries transform local structures of government, while others simply extract resources for their own benefit. In some contexts, groups kill their victims selectively, while in other environments violence appears indiscriminate, even random. This book presents a theory that accounts for the different strategies pursued by rebel groups in civil war, explaining why patterns of insurgent violence vary so much across conflicts. It does so by examining the membership, structure, and behavior of four insurgent movements in Uganda, Mozambique, and Peru. Drawing on interviews with nearly two hundred combatants and civilians who experienced violence firsthand, it shows that rebels' strategies depend in important ways on how difficult it is to launch a rebellion. The book thus demonstrates how characteristics of the environment in which rebellions emerge constrain rebel organization and shape the patterns of violence that civilians experience.

The Environment And Marxism-leninism Jan 15 2022
In the past two decades, environmental pollution and
natural resource shortages have evoked increasing
concern in the Soviet Union and Eastern Europe. The
emerging ecological crisis has challenged many common
assumptions in the Soviet bloc, as in the West. This book
provides, for the first time, a detailed and comprehensive
analysis of the ecology debate in the USSR and its highly
industrialized ally, the German Democratic Republic
(GDR). Based on a thorough examination of the Soviet
and GDR sources, Dr. DeBardeleben explores the

authorities' attempts to explain the problem to their populations. She also examines the viewpoints of scientists, writers, and scholars, with special attention to economic dimensions of the ecology debate. The study reveals the increasing sophistication of specialists in influencing public policy by adapting official values to support their positions. Through comparison of the Soviet and East German cases, the study clarifies the impact of natural resource endowment and legitimacy dilemmas on treatment of the ecology issue. The book demonstrates that Marxist-Leninist values subtly affect Soviet and GDR responses, but at the same time the environmental crisis is forcing a reevaluation of some aspects of Marxist-Leninist theory and ideology itself.

Organophosphorus Chemistry Jul 29 2020

Organophosphorus Chemistry provides a comprehensive annual review of the literature. Coverage includes phosphines and their chalcogenides, phosphonium salts, low coordination number phosphorus compounds, penta- and hexa-coordinated compounds, trivalent phosphorus acids, nucleotides and nucleic acids, ylides and related compounds, and phosphazenes. The series will be of value to research workers in universities, government and industrial research organisations, whose work involves the use of organophosphorus compounds. It provides a concise but comprehensive survey of a vast field of study

with a wide variety of applications, enabling the reader to rapidly keep abreast of the latest developments in their specialist areas. Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

Paper to Digital Mar 25 2020 Is the paperless society really possible? What is the future of paper in the Digital Age? Based on extensive statistics and six separate surveys, Paper to Digital explores the evolution and changing characteristics of documents in the Information Age. Resultant implications are studied through the examination of emerging issues in the digital environment. This timely book represents a useful and scholarly exploration of a major concern in our society.

The World Health Organization between North and South

Jan 03 2021 Since 1948, the World Health Organization (WHO) has launched numerous programs aimed at improving health conditions around the globe, ranging from efforts to eradicate smallpox to education programs about the health risks of smoking. In setting global health priorities and carrying out initiatives, the WHO bureaucracy has faced the challenge of reconciling the preferences of a small minority of wealthy nations, who fund the organization, with the demands of poorer member countries, who hold the majority of votes. In *The World Health Organization between North and South*, Nitsan Chorev shows how the WHO bureaucracy has succeeded not only in avoiding having its agenda co-opted by either coalition of member states but also in reaching a consensus that fit the bureaucracy's own principles and interests. Chorev assesses the response of the WHO bureaucracy to member-state pressure in two particularly contentious moments: when during the 1970s and early 1980s developing countries forcefully called for a more equal international economic order, and when in the 1990s the United States and other wealthy countries demanded international organizations adopt neoliberal economic reforms. In analyzing these two periods, Chorev demonstrates how strategic maneuvering made it possible for a vulnerable bureaucracy to preserve a relatively

autonomous agenda, promote a consistent set of values, and protect its interests in the face of challenges from developing and developed countries alike.

How to Dismantle the NHS in 10 Easy Steps May 07

2021 Events have spiralled since the first edition of *How to Dismantle the NHS in 10 Easy Steps*. The junior doctors' strike, the Conservative victory in the 2015 general election, the Corbyn phenomenon, the unexpected Brexit vote and the arguably even more unexpected loss of the Conservative majority in 2017. Further, since writing the first edition, Dr. Youssef El-Gingihy found himself stricken with a life-threatening illness and the NHS doctor became the NHS patient. The fight to save the NHS transformed into a fight for his own life. Now, fully recovered, Dr. Youssef El-Gingihy returns to his 10 Easy Steps in order to strengthen his original argument and continue what Labour leader, Jeremy Corbyn, deems 'one of the most fundamental battles we face in a struggle for a British society that works for the many'. In the year of the 70th anniversary of the NHS, Dr El-Gingihy's insights have never been more vital as our national health

service continues to be hit by the privatisation of public services. New expanded second edition with chapters on junior doctor's strikes and plans for US-style healthcare.

Christianity as a World Religion Jan 23 2020 Now in its second edition, *Christianity as a World Religion* locates Christianity within its global context. Structured by geographical region, it covers Asia, Africa, Europe, Latin America and the Caribbean, North America, and Oceania. It deals with four dimensions of Christianity in each context: Christian history, churches and society, interreligious relations, and distinctive worship and theology. Study questions and further reading suggestions are provided in each chapter. Fully updated throughout, this second edition now includes: - A new chapter covering Christianity in Oceania - Further analysis of the early growth of Christianity in Asia and Africa - Coverage of research trends in migration, theologies of prosperity, and the role of local agents in evangelization - Coverage of global interconnections and networks, new movements, global Catholicism, Christian political engagement and persecution of Christian communities - A thorough revision of the conclusion, including reflection on the discipline of world Christianity and its implications for theology - 40 images and maps - Chapter summaries - Extra resources online including a timeline and weblinks - New text design and layout, making the text more

student-friendly and accessible Christianity as a World Religion is ideal for courses on World Christianity, Christianity as a Global Religion, the History of Christianity and contemporary Christian theology.
