Employees have a set of needs as part of the 'psychological contract' of employment. However, organizations operate for a reason and they too have agendas and needs. It is how the two come together that determines the capacity for good human relations and optimum productivity. Employee Well-being Support is an edited collection of expert contributions that explores all key issues in this increasingly critical area. Receiving a text from Sasha, my girlfriend, at work was always risky. Especially when she wanted to know if her girlfriend was horny. A short and sweet (and filthy) story. A guide to landscape photography using a DSLR camera covers such topics as light, composition, perspective, lenses, black-and-white images, and HDR. Large, diversified firms face unique challenges as they compete worldwide, and corporate restructuring is one way multinationals strive for competitive advantage. Weighing the pros and cons of a variety of approaches to restructuring, Downscoping offers executives a clear, strategic path through the maze. The authors show that when a multinational conglomerate fails to compete effectively, too much diversification may be the culprit. Whether the result of weak corporate governance or poor corporate strategy, over-diversification can make managers, unfamiliar with some of the markets in which they compete, opt for safety over innovation. This risk-aversion and lack of long-range commitment to innovation lead inevitably to stagnation over the longer term. The answer is not downsizing--closing offices and laying off personnel--but downsizing: a strategic approach to restructuring. The options include incentive and compensation adjustments for executives, leveraged buy-outs and capital structure changes, focusing on core skills, diversifying internationally while focusing on businesses in which a firm has strong competencies, and buying and selling mature businesses where product development is not a great concern. Regardless of the approach, executives must exercise strategic leadership during and after restructuring, including providing strategic direction, exploiting core competencies, developing human capital, and sustaining the corporate culture. Based on systematic research rather than casual observation, Downscoping provides a strong description of restructuring alternatives and their resulting tradeoffs. Its specific guidelines for maintaining competitiveness will be essential reading for managers involved in corporate restructuring. Interpersonal rejection ranks among the most potent and distressing events that people experience. Romantic rejection, ostracism, stigmatization, job termination, and other kinds of rejections have the power to compromise the quality of people's lives. As a result, people are highly motivated to avoid social

rejection, and, indeed, much of human behavior appears to be designed to avoid such experiences. Yet, despite the widespread effects of real, anticipated, and even imagined rejections, psychologists have devoted only passing attention to the topic, and the research on rejection has been scattered throughout a number of psychological subspecialties (e.g., social, clinical, developmental, personality). In the past few years, however, we have seen a surge of interest in the effects of interpersonal rejection on behavior and emotion. The goal of this book is to pull together the contributions of several scholars whose work is on the cutting edge of rejection research, providing a scholarly yet readable overview of recent advances in the area. In doing so, it not only provides a look at the current state of the area but also helps to establish the topic of rejection as an identifiable area for future research. Topics covered in the book include: ostracism, unrequited love, betrayal, stigmatization, rejection sensitivity, rejection and self-esteem, peer rejection in childhood, emotional responses to rejection, and personality moderators of reactions to rejection. A formidable strategic tool any business can use to become and remain competitive in the shadow of retail giants. The 2003 International Building Code addresses the design and installation of building systems through requirements that emphasize performance, providing minimum regulations for building systems using prescriptive- and performance-related provisions, including structural as well as fire- and life-safety provisions covering seismic, wind, accessibility, egress, occupancy, roofs, and more. This volume is the second one of the 16th East-European Conference on Advances in Databases and Information Systems (ADBIS 2012), held on September 18-21, 2012, in Poznań, Poland. The first one has been published in the LNCS series. This volume includes 27 research contributions, selected out of 90. The contributions cover a wide spectrum of topics in the database and information systems field, including: database foundation and theory, data modeling and database design, business process modeling, query optimization in relational and object databases, materialized view selection algorithms, index data structures, distributed systems, system and data integration, semi-structured data and databases, semantic data management, information retrieval, data mining techniques, data stream processing, trust and reputation in the Internet, and social networks. Thus, the content of this volume covers the research areas from fundamentals of databases, through still hot topic research problems (e.g., data mining, XML data processing), to novel research areas (e.g., social networks, trust and reputation, and data stream processing). The editors of this volume believe that its content will inspire the researchers with new ideas for future development. It may also serve as an overview of the ongoing work in the field of databases and information systems. Gathering the outcomes of the 27th annual international eTourism conference ENTER2020, this book presents new research, innovative systems and industry case studies on the application of Information and Communication Technologies (ICT) in travel and tourism. It shares the latest findings discussed at the conference and highlights various topics within the field, including social media, destination marketing, recommender systems and decision-making, virtual and augmented reality, technology in tourism, and research on hotels and activities. Readers will find a wealth of state-of-the-art insights and ideas on how information and communication technologies can be applied in travel and tourism. An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the *Catapult* column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor. This document presents the Global Environmental Facility's (GEF) policy on public investment in GEF financed projects. At its meeting in April 1996, the GEF Council approved the principles presented herein as a basis for public involvement in the design, implementation and evaluation of GEF-financed projects. The Council stressed that when applying the principles, there should be emphasis on local participation and local stakeholders, specific conditions in-country should be taken into consideration, and public involvements should be consistent with the provision of the instrument for the establishment of the restructured GEF. This document builds upon previous papers and incorporates comments from consultations; part 1, provides the rationale and definition of public involvement. The basic principles of public involvement are presented in part 2, together with an identification of how the principles will be applied by the Secretariat, implementing agencies, project executing agencies, and other participating in GEF-financed projects. being commercialized to provide power to buildings like hospitals and schools, to replace batteries in portable electronic devices, and as replacements for internal combustion engines in vehicles. PEM (Proton Exchange Membrane) fuel cells are lighter, smaller, and more efficient than other types of fuel cell. As a result, over 80% of fuel cells being produced today are PEM cells. This new edition of Dr. Barbir's groundbreaking book still lays the groundwork for engineers, technicians and students better than any other resource, covering fundamentals of design, electrochemistry, heat and mass transport, as well as providing the context of system design and applications. Yet it now also provides invaluable information on the latest advances in modeling, diagnostics, materials, and components, along with an updated chapter on the evolving applications areas wherein PEM cells are being deployed. Although Vulgar Latin is not well documented, evidence can be deduced from details of the spelling, grammar, and vocabulary that occur in texts of the later Roman Empire, late antiquity, and the early Middle Ages. Every aspect of Vulgar Latin is exemplified in this book, proving that the language is not separate in itself, but an integral part of Latin. Originally published in French in 1967, Vulgar Latin was translated more recently into Spanish in an expanded and revised version. The English translation by Roger Wright accurately portrays Vulgar Latin as a complicated field of study, where little is known with absolute certainty, but a great deal can be worked out with considerable probability through careful critical analysis of the data. This text is an invaluable aid to research and understanding for all those interested in Latin, Romance languages, historical linguistics, early medieval texts, and early medieval history. József Herman is the former director of the Linguistic Research Institute at the Hungarian Academy of Sciences and is currently Professor of Latin Linguistics at the University of Venice. He is a well-known authority on the history of later Latin and the prehistory of Romance languages

The WWDR 2014 on Water and Energy is now an annual and thematic report with a focus on different strategic water issues each year. It is shorter in the order of 100 pages with a standardized structure and data and case studies annexes related to the theme. The WWDR 2014 will be launched during the main World Water Day celebrations in Tokyo, Japan on 21 March 2014. Water and energy are closely interconnected and highly interdependent. Trade-offs need to be managed to limit negative impacts and foster opportunities for synergy. Water and energy have crucial impacts on poverty alleviation both directly, as a number of the Millennium Development Goals depend on major improvements in access to water, sanitation, power and energy sources, and indirectly, as water and energy can be binding constraints on economic growth the ultimate hope for widespread poverty reduction. This fifth edition of the United Nations World Water Development Report (WWDR 2014) seeks to inform decision-makers This book discusses essential

approaches and methods in connection with engineering education for sustainable development. Prepared as a follow-up to the 2015 Engineering Education in Sustainable Development (EESD) Conference held in British Columbia, Canada, it offers the engineering community key information on the latest trends and developments in this important field. Reflecting the need to address the links between formal and informal education, the scholars and professionals who contribute to this book show by means of case studies and projects how the goal of fostering sustainable development in the context of engineering education can be achieved. In particular, they discuss the need for restructuring teaching at engineering-focused institutions of higher education and provide practical examples of how to do so. The book places special emphasis on state-of-the-art descriptions of approaches, methods, initiatives and projects from around the world, illustrating the contribution of engineering and affiliated sciences to sustainable development in various contexts, and at an international scale. This paper reviews the Annual Progress Report (APR) on Poverty Reduction Strategy Paper (PRSP) on Benin. Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather. * Mark Twight's collected works, some never before published in North America * Includes dramatic black and white mountaineering photos * Features brand new epilogues to all of the stories They call him Dr. Doom. Raving and kicking against mediocrity, his anger and pain simmer close to the surface. He speaks and writes the language of the punk music that defined him. He is extreme alpinist Mark Twight, and he doesn't back down from the truth. He's a one-man literary punk band. If you have any doubt, here comes his knockout punch: the only collection of writing Twight swears he'll ever publish. Kiss or Kill: Confessions of a Serial Climber is raw, unfiltered Twight. These author's cut are the real deal, not the homogenized fluff offered up by magazine editors who are often unwilling to offend. Twight's words make it clear that climbing is only distantly about the summit. Several of these pieces are new to U.S. readers. Twight edited all of the selections and appended each with a current author's note: confessing his inspiration, events that followed, and lessons learned (or not learned, some might say). It adds up to a frightfully lucid look into Twight's personal life as both man and hardcore alpine climber. The dissection scares me sometimes... Whether railing against the spinelessness of American siege-style mountaineering, admitting addiction to pushing the bounds of the possible, or reveling in his ability to cut away anything in life that holds him back, Twight never blinks. Along the way, there is the drama of new and epic routes, unbreakable bonds between climbing partners, and Twight's evolution as a climber and a man. He tells every story in a unique, in-your-face style. Kiss or Kill is not an easy read. It may scare some readers-but that's the point. "I want this book to help you recognize your own anger, which will help you understand mine", says Twight. "Somewhere out there somebody understands these words and knows they matter. They were written in blood, learned by heart." Excerpt from A Latin-English Dictionary: For the Use of Junior Students Abridge From the Larger Work of White and Riddle As the suffix always forms the last portion of a word, and follows the hyphen in simple words and the last hyphen in compound words, it has not been thought necessary to repeat in any instance what it is, inasmuch as it is self-evident. Where no suffix is used, the fact will appear in the statement given of the origin of the word. Such is the outline of the plan upon which the leading words in this work are printed; a plan which, it is confidently believed, will go far to render an acquaintance with the mode of formation, and the etymological meaning, of words in general, comparatively easy even to persons beginning to study the Latin language. Should further insight into these matters be desired, it may be obtained from the work already mentioned Latin Suffixes. Much, also, will soon be procurable from the forthcoming Public Schools Latin Grammar, especially with regard to letter-changes, and the construction of the cases of nouns and of the perfect tenses and the supines of verbs. From an examination of that work, which has been courteously conceded to the author of this Dictionary, in common with certain others engaged in educational pursuits, he is enabled to speak of the effort to harmonize grammatical teaching in this country as being, in his judgment, most skillfully carried out, and likely to be hailed as a great boon by all who can appreciate the advantages

that cannot but accrue from the general adoption of one standard Grammar for the primary instruction of youth.
