 web many of the physical properties of solutions differ significantly from those of
 the pure substances discussed in earlier chapters and these differences have
 important consequences for example the limited temperature range of liquid
 water 0 c 100 c severely limits its use web jan 30 2023 the enthalpy of solution
 can expressed as the sum of enthalpy changes for each step $\Delta h_{\text{solution}} = \Delta h_1 + \Delta h_2 + \Delta h_3$
 so the enthalpy of solution can either be endothermic exothermic or neither
 $\Delta h_{\text{solution}} = 0$ depending on how much heat is required or release in each step if
 $\Delta h_{\text{solution}} = 0$ then the solution is called an ideal web this chapter helps students
