With social and community services coming under increasing pressure as austerity continues, Unfinished Business examines how social policy has operated in Ireland and how it has been affected by consistent government cutbacks. It examines a wide range of issues important to social care students, such as poverty, homelessness, disability,

immigrants, mental health and many other issues pertinent to Irish society today. This book: Is the first Irish social policy textbook written for social care students Poses important questions about not only social policy approaches but also policy failings, and makes the case for a move towards social policy regulation Is useful to students from other disciplines, such as community work, early childhood studies, nursing, addiction studies and child protection studies Is written in a clear and accessible style and laid out in a user-friendly manner The book is aimed at undergraduate students in social studies, social science and public administration, and will also prove useful to practitioners who seek to broaden their understanding of social care. The Armed Forces Special Powers Act (AFSPA) has become one of the most controversial laws, both in India and the world. A few NGOs and human rights activists have described it as draconian, alleging that it gives the armed forces unrestricted power to 'arrest' without warrant, 'destroy property' and 'shoot to kill', besides providing them with complete immunity. The loud and continuous clamour against the Act has drawn the attention of various international organizations. The UN Special Rapporteur on Extrajudicial, Summary or Arbitrary Executions, Christof Heyns, has recently called for the repeal of the law, stating: "AFSPA allows the state to override rights. Such a law has no role in a democracy and should be scrapped." On the other hand, the armed forces hold that the AFSPA is necessary for tackling the growing menace of militancy and protecting their men from the

unnecessary harassment caused by litigation. General V K Singh, the former chief of army staff and now a cabinet minister, has emphasized that the AFSPA is a 'functional requirement' of the armed forces. This is the first book in India not only to attempt a complete analysis of the various provisions of the AFSPA, but also to provide an insight into the legislative efforts of other democracies to meet the challenges of growing terrorism. It delves into cases of human rights violations in which members of the armed forces have been implicated, and at the same time, argues that it is equally important to safeguard the human rights of the members of the armed forces. In order to help find an amicable solution, the author makes a few recommendations for the consideration of the government and armed forces. This book explores the interface between terrorism and the internet and presents contemporary approaches to understanding violent extremism online. The volume focuses on four issues in particular: terrorist propaganda on the internet; radicalisation and the internet; counter campaigns and approaches to disrupting internet radicalisation; and approaches to researching and understanding the role of the internet in radicalisation. The book brings together expertise from a wide range of disciplines and geographical regions including Europe, the US, Canada and Australia. These contributions explore the various roles played by the Internet in radicalisation; the reasons why terroristic propaganda may or may not influence others to engage in violence; the role of political conflict in online radicalisation; and the future of research into terrorism and the internet.

By covering this broad range of topics, the volume will make an important and timely addition to the current collections on a growing and international subject. This book will be of much interest to students and researchers of cyber-security, internet politics, terrorism studies, media and communications studies, and International Relations. This volume examines the interaction between foreign policy-making and multicultural societies. It analyses the challenges of rapid social change associated with inward migration and increased ethnic and cultural diversity in ten EU Member States. The definitive introduction to the study of leadership, covering key theories and issues whilst examining leadership practice through a range of distinctive case study examples chosen to challenge the common misconception of leadership being only for the 'great and good'. This book offers a unique analysis of bilateral investment treaties (BITs). By developing a new, power-focused paradigm for understanding the international investment framework, the author illustrates why there was no paradoxical behaviour when developing countries agreed to the BIT regime, and what has spurred their reaction against it now. She also examines how attempts to regulate investment at a multilateral level have failed, and why the rules of the framework are evolving. Inspired by the work of Susan Strange, Gwynn fills a significant lacuna in our understanding of these issues by demonstrating how power determines the actions of all those involved. This holistic reinterpretation of international investment focuses in particular on Latin America, but has wider implications for the negotiation of new treaties, including such controversial provisions as the Transatlantic Trade and Investment Partnership. It will appeal to lawyers, economists, political scientists and scholars of Latin America. The job

Scotland's Choices, now fully revised for the critical last few months before the referendum, explains the choice that Scotland will have to make in September 2014. The authors clearly explain the issues and how each of the options would be put into place This edited volume explores the question of the lawfulness under international law of economic activities in occupied territories from the perspectives of international law, EU law, and business and human rights. Providing a multi-level overview of relevant practices, policies and cases, the book is divided in three parts, each dealing with how different legal fields have come to grips with the challenges brought about by the question of the lawfulness under international law of economic activities in occupied territories. The first part includes contributions pertaining to the international law dimension of the question. It

contains chapters on the conjunction between jus in bello, jus ad bellum and international human rights law in the context of exploitation of natural resources in territories under belligerent occupation; on third party obligations flowing from the application of occupation law in relation to natural resources exploitation; and on State practice with regards to trading with occupied territories. The second part focuses on EU law and contains contributions that assess the EU's approach to occupied territories and the extent to which this approach comports with the EU's obligations under international law; contributions providing an in-depth assessment of the case-law of the CJEU on occupied territories; as well as contributions pertaining to the political considerations that may influence the legal framing of questions pertaining to occupied territories. The final part focuses on the business and human rights perspective, with chapters on investment arbitration as a means for holding the occupant accountable for its conduct towards foreign investments and investors; on the role and impact of the soft law framework governing corporate activity (such as the UN Guiding Principles) on business involvement with occupied territories; as well as a final case study on the dispute involving Israeli football activity in settlements located in the OPT and the legal responsibility of FIFA in this regard. The book will appeal to academics, practitioners and policy-makers alike. The job interview is probably the most important step you will take in your job search journey. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry. Throughout American history, presidents have shown a startling power to act independently of Congress and the courts. On their own initiative, presidents have taken the country to war, abolished slavery, shielded undocumented immigrants from deportation, declared a national emergency at the border, and more, leading many to decry the rise of an imperial presidency. But given the steep barriers that usually prevent Congress and the courts from formally checking unilateral power, what stops presidents from going it alone even more aggressively? The answer, Dino P. Christenson and Douglas L. Kriner argue, lies in the power of public opinion. With robust empirical data and compelling case studies, the authors reveal the extent to which domestic public opinion limits executive might. Presidents are emboldened to pursue their own agendas when they enjoy strong public support, and constrained when they don't, since unilateral action risks inciting political pushback, jeopardizing future initiatives, and further eroding their political capital. Although few Americans instinctively recoil against unilateralism, Congress and the courts can sway the public's view via their criticism of unilateral policies. Thus, other branches can still check the executive branch through political means. As long as presidents are concerned with public opinion, Christenson and Kriner contend that fears of an imperial presidency

are overblown. The job interview is probably the most important step you will take in your job search journey. This lively collection presents a multi-disciplinary, multi-perspectival commentary

explaining the what, where, and how of the riots that the austerity-hit UK experienced during the long, hot summer of 2011. It looks beyond London and its Tottenham district where disturbances started, to locations such as Manchester and Birmingham. Parallels are drawn with Cairo during the period of the Arab spring, and even with the Star Wars saga. The book locates the riots in historical context by looking at the previous UK riots of 1981 and 2001, looking at how news cycles and concepts such as that of 'moral panic' have changed in the age of social networking. It is essential reading for anyone interested in contemporary debates in social policy, media studies, anthropology sociology, cultural studies, and human geography. This book was originally published as a special issue of the Journal for Cultural Research.
