**Population Change in Southeast Asia** Oct 26 2022 A collection of selected and condensed reports on the broad subject of Population Change in Southeast Asia, this book represents the work of young Southeast Asian social scientists. Their research has helped to cast more light on the problems associated with rapid population growth, more specifically the areas of fertility, population mobility, family planning, the evaluation of family planning programs, and the environmental influence of demographic behaviour.

**Advancing Cloud Database Systems and Capacity Planning With Dynamic Applications** Dec 28 2022 Continuous improvements in data analysis and cloud computing have allowed more opportunities to develop systems with user-focused designs. This not only leads to higher success in day-to-day usage, but it increases the overall probability of technology adoption. Advancing Cloud Database Systems and Capacity Planning With Dynamic Applications is a key resource on the latest innovations in cloud database systems and their impact on the daily lives of people in modern society. Highlighting multidisciplinary studies on information storage and retrieval, big data architectures, and artificial intelligence, this publication is an ideal reference source for academicians, researchers, scientists, advanced level students, technology developers and IT officials.

**Transition from School to Work** Feb 03 2021 This is an ethnographic research study on the transition from school to work (TSW) experiences of nine Form Five school leavers in Malaysia who possess different academic abilities and who came from different family and ethnic backgrounds. This study examines how they resolve the work-study dilemma as well as how they made their career choices, indicating that career decisions are linked to the culture and identities of the subjects. In this book, the author endeavors to bring to attention the subjects experiences as they navigate their way through the social structures that confront them throughout this transitional period. Through the descriptions of their life stories and experiences, he seeks to highlight the dilemmas faced by the young men as well as the often difficult and painful process of decision-making in their TSW. Attention has also been drawn to the structural constraints that they encounter and also the resources and strategies they employ to deal with these constraints

**Campus Plus 2020** Jul 31 2020 India, bounded by the majestic Himalayan ranges in the North and edged by an endless stretch of golden beaches, is the land of hoary tradition and cultural diverse. Vivid kaleidoscope of landscapes, glorious historical sites and royal cities, misty mountain hideaways, colourful people, rich civilizations and festivities craft India Incredible. Recent years have witnessed the educational scene, especially the higher education sector in the State undergoing a sea change in respect of quality, diversity and accessibility in tune with the global trends. Kerala's surge in the educational front is to be viewed in the backdrop of the country's great legacy in education. India has been a major seat of learning for thousands of years. The country was home to Takshashila, the first university in the world and Aryabhama, the inventor of the digit Zero. In fact, education in Kerala has now become more value added and affordable, thanks to the pro-active initiatives of the State Government and active involvement of the private sector. Moreover, in the higher education market, Kerala has a significant edge in respect of cost which means that there would be growing influx of candidates into the state from outside the state for better and affordable professional education in the days to come. With the most sought after professionals and excellent network of institutes Kerala is becoming the very preferred educational destination in the world. And, we are equipped for you with some elucidations which step-up her significance in the educational map. In Campus Plus, we propose some valuable information along with a number of educational institutes in the State which will be useful for the students and parents in the higher education scenario.

**My Search For a Love In India** Mar 31 2023 About the book: The book 'MY SEARCH FOR A LOVE IN INDIA' is an autobiography of Mr.U.Annadurai.His life history from the years 1981-1983, when he was studying his M.Sc Mathematics at, Madurai Kamaraj University, Tamilnadu, is written by him in this book. He says about his life when he did his M.PHIL Maths and M.PHIL Futures studies in M.K.University.He says about his experiences in his employments with the Life Insurance Corporation of India. He says about his career as a temporary lecturer in Mathematics in 11 Colleges, GRI, and as an Assistant professor in Mathematics under Tamilnadu government collegiate education service. He gives his friendship with some girls but none of them married him. He is the author of the book 'HUMAN LOVE AND RELATIONSHIP'.He is the author of 'ON THE WAY IN MY LIFE' a short.

**Development of Perfectly Matched Layer Numerical Boundary Condition in a Generalized Coordinate System** May 09 2021 The research activity leading to this dissertation focused on the boundary treatment for computational fluid dynamics problems, especially those with unbounded domains. This involved a rigorous literature survey of boundary treatment techniques. The primary interest of this effort was on one of the emerging concepts of nonreflecting boundary treatment for numerical schemes, namely the perfectly matched layer (PML) absorbing technique. The need for an appropriate space-time transformation for a stable PML emphasized in previous efforts was the starting point for this developmental research activity. Based on this, unsplit PML equations were constructed for Euler equations linearized over a uniform mean flow with a proper space-time transformation. Dispersion analysis was carried out to demonstrate the effectiveness of the space-time transformation in terms of stability of the PML formulation. Numerous numerical simulations were carried out to investigate the stability of the PML formulation for long-term integration of various combinations of time-step size and PML parameters. The major focus of this research was to extend the construction of the PML for nonlinear Euler equations in a generalized coordinate system to widen its application in uniform and nonuniform grid structures. Emphasis was placed on the application of conventional numerical schemes without employing any form of artificial dissipation or numerical filtering. With this objective in mind, the split-form PML equations for nonlinear Euler equations were constructed. Various numerical simulations were carried out to validate the PML formulation and demonstrate its effectiveness as an absorbing boundary condition.

**Counselling Guru** May 01 2023 About CounsellingGuru CounsellingGuru is a comprehensive guide for all the Engineering aspirants of Tamilnadu. This book is aimed at providing complete information about engineering studies and statistical analysis on Tamilnadu Engineering Admissions [TNEA] counselling. It gives an insight to the reader about various branches of study in engineering and helps in selecting suitable branch of study based on one's personal preference and performance in final school year. Why CounsellingGuru?In the recent years, the interest towards engineering has increased among student community in Tamilnadu. Also in the last 13 years, the number of engineering colleges has increased approximately from 200 to 520+. In this scenario finding information about all the colleges and selecting the right branch in right college has become a tough task for any engineering aspirant. It is not easy, to come up with a right decision for one's career, based on the vast amount of information available in the internet and through other sources. One of the strongest motivations for writing this book is to provide complete information about different engineering branches, colleges, and the counselling process followed in Tamilnadu Engineering Admissions. Analyzing the information about previous year counsellings, helps a student to take an informed decision about the suitable branch and college for his/her rank. Based on the counselling trend from the year 2007 to till date, this book is aimed at addressing the basic questions like 1. For one's TNEA rank, which is the best college and course? 2. What are the top colleges for a particular branch? 3. What does one learn in a particular Engineering branch? 4. Which branch & college was selected by a candidate with the same TNEA rank during the last few years? Counselling Guru will definitely help every engineering aspirant to take right decision for their career. What is inside?Engineering Branches - Overview, Scope of each branches, who can opt each branch,etc.List of all Engineering Colleges in Tamilnadu - Coming under Anna University CounsellingTop Engineering Colleges - Overall (Top 100) and Branch-wise (Top 50) priority list TNEA Historic data analysis from TNEA 2007 onwardCounselling Worksheet for TNEATips for choosing payment seatsGuidelines for students and parents appearing for Engineering counselling The guidelines given in this book are developed by authors based on their rich experience in academics and engineering industry. More Info @ <http://www.counselling.guru/counsellingguru.html>

**MERGERS AND ACQUISITIONS, SECOND EDITION** Sep 12 2021 The Covid-19 pandemic-induced downturn and subsequent Russia-Ukraine war have triggered unprecedented financial shock and disruption to the business world. Challenges are unique to each corporation. The forward-looking corporate leaders are fighting now to rebalance risk, profitability and liquidity while looking for new growth opportunities and gaining resilience to come out of the crisis as fast as possible. Mergers and Acquisitions (M&A) being one of the most powerful tools is set to play a bigger role in this direction. It is time now that M&As move at speed and help overcome the present downturn in the economy. Business leaders will have good reasons to leverage M&A as a holistic response to the business and economic crisis. It is in this context that a thoroughly revised edition of the comprehensive book on M&As by Professor Kamal Ghosh Ray becomes so well-timed and significant. The book is an "A to Z" of M&A, ranging from strategy, valuation, legal aspects to integration. The new edition incorporates various new concepts, ideas and thoughts with appropriate discussion in detail. Business valuation has a substantial coverage in the book as the subject, "Valuation" is offered in many academic programmes in universities and business schools. The text is profusely illustrated with many examples and case studies and contains huge number of numerical problems and solutions. Primarily intended as a text for

postgraduate students of management and law, the book in its second edition will be of immense value to students of CA, CMA, CFA, CS, etc. and professionals ranging from strategic planners, CFOs, CEOs, COOs, financial analysts, bankers, to venture capitalists, corporate lawyers and business owners. Click on 'Endorsements' tab to check 'What the reviewers say' **NEW TO THIS EDITION** • Thoroughly revised and updated with the latest trends and relevant regulatory developments in M&A • A dedicated chapter on Numerical Problems and Solutions for easy understanding of complex M&A concepts • Topics like Corporate Restructuring, Disinvestment policy of the government, valuation of startup companies, SPAC (special purpose acquisition companies), Platform Acquisitions, deeper aspects of cross-border M&A and hostile takeover make the new edition contemporary. **TARGET AUDIENCE** • Postgraduate students of management and law. • Students of CA, CMA, CFA, CS, etc. • Professionals ranging from strategic planners, CFOs, CEOs, COOs, financial analysts, bankers, to venture capitalists, corporate lawyers and business owners.

*Universities Handbook* Nov 14 2021

**Handbook of Universities** Feb 27 2023 The Most Authentic Source Of Information On Higher Education In India The Handbook Of Universities, Deemed Universities, Colleges, Private Universities And Prominent Educational & Research Institutions Provides Much Needed Information On Degree And Diploma Awarding Universities And Institutions Of National Importance That Impart General, Technical And Professional Education In India. Although Another Directory Of Similar Nature Is Available In The Market, The Distinct Feature Of The Present Handbook, That Makes It One Of Its Kind, Is That It Also Includes Entries And Details Of The Private Universities Functioning Across The Country. In This Handbook, The Universities Have Been Listed In An Alphabetical Order. This Facilitates Easy Location Of Their Names. In Addition To The Brief History Of These Universities, The Present Handbook Provides The Names Of Their Vice-Chancellor, Professors And Readers As Well As Their Faculties And Departments. It Also Acquaints The Readers With The Various Courses Of Studies Offered By Each University. It Is Hoped That The Handbook In Its Present Form, Will Prove Immensely Helpful To The Aspiring Students In Choosing The Best Educational Institution For Their Career Enhancement. In Addition, It Will Also Prove Very Useful For The Publishers In Mailing Their Publicity Materials. Even The Suppliers Of Equipment And Services Required By These Educational Institutions Will Find It Highly Valuable.

**Recombinant DNA Research** Jun 21 2022

**Handbook of Service Science, Volume II** Dec 16 2021 The second volume of this successful handbook represents varied perspectives on the fast-expanding field of Service Science. The novel work collected in these chapters is drawn from both new researchers who have grown-up with Service Science, as well as established researchers who are adapting their frames for the modern service context. The first Handbook of Service Science marked the emergence of Service Science when disciplinary studies of business-to-customer service systems intertwined to meet the needs of a new era of business-to-business and global service ecosystems. Today, the evolving discipline of Service Science involves advanced technologies, such as smartphones, cloud, social platforms, big data analytics, and artificial intelligence. These technologies are reshaping the service landscape, transforming both business models and public policy, ranging from retail and hospitality to transportation and communications. By looking through the eyes of today's new Service Scientists, it is anticipated that value and grand challenges will emerge from the integration of theories, methods, and techniques brought together in the first volume, but which are now rooted more deeply in service-dominant logic and systems thinking in this second volume. The handbook is divided into four parts: 1) Service Experience--On the Human-centered Nature of Service; 2) Service Systems--On the Nature of Service Interactions; 3) Service Ecosystems--On the Broad Context of Service; 4) Challenges--On Rethinking the Theory and Foundations of Service Science. The chapters add clarity on how to identify, enable, and measure service, thus allowing for new ideas and connections made to physics, design, computer science, and data science and analytics for advancing service innovation and the welfare of society. Handbook of Service Science, Volume II offers a thorough reference suitable for a wide-reaching audience including researchers, practitioners, managers, and students who aspire to learn about or to create a deeper scientific foundation for service design and engineering, service experience and marketing, and service management and innovation.

*Waste to Wealth* Jan 05 2021 This book focuses on value addition to various waste streams, which include industrial waste, agricultural waste, and municipal solid and liquid waste. It addresses the utilization of waste to generate valuable products such as electricity, fuel, fertilizers, and chemicals, while placing special emphasis on environmental concerns and presenting a multidisciplinary approach for handling waste. Including chapters authored by prominent national and international experts, the book will be of interest to researchers, professionals and policymakers alike.

**Coronavirus Disease (COVID-19): Pathophysiology, Epidemiology, Clinical Management and Public Health Response** Mar 19 2022 Volume I.A An outbreak of a respiratory disease first reported in Wuhan, China in December 2019 and the causative agent was discovered in January 2020 to be a novel betacoronavirus of the same subgenus as SARS-CoV and named severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Coronavirus disease 2019 (COVID-19) has rapidly disseminated worldwide, with clinical manifestations ranging from mild respiratory symptoms to severe pneumonia and a fatality rate estimated around 2%. Person to person transmission is occurring both in the community and healthcare settings. The World Health Organization (WHO) has recently declared the COVID-19 epidemic a public health emergency of international concern. The ongoing outbreak presents many clinical and public health management challenges due to limited understanding of viral pathogenesis, risk factors for infection, natural history of disease including clinical presentation and outcomes, prognostic factors for severe illness, period of infectivity, modes and extent of virus inter-human transmission, as well as effective preventive measures and public health response and containment interventions. There are no antiviral treatment nor vaccine available but fast track research and development efforts including clinical therapeutic trials are ongoing across the world. Managing this serious epidemic requires the appropriate deployment of limited human resources across all cadres of health care and public health staff, including clinical, laboratory, managerial and epidemiological data analysis and risk assessment experts. It presents challenges around public communication and messaging around risk, with the potential for misinformation and disinformation. Therefore, integrated operational research and intervention, learning from experiences across different fields and settings should contribute towards better understanding and managing COVID-19. This Research Topic aims to highlight interdisciplinary research approaches deployed during the COVID-19 epidemic, addressing knowledge gaps and generating evidence for its improved management and control. It will incorporate critical, theoretically informed and empirically grounded original research contributions using diverse approaches, experimental, observational and intervention studies, conceptual framing, expert opinions and reviews from across the world. The Research Topic proposes a multi-dimensional approach to improving the management of COVID-19 with scientific contributions from all areas of virology, immunology, clinical microbiology, epidemiology, therapeutics, communications as well as infection prevention and public health risk assessment and management studies.

**Pastel Fondness** Jul 11 2021 Pastel fondness is an anthology describing the different shades of love for others and their closed circle. This book has beautifully penned with 40 writers outpouring their feelings for their loved ones in the form of poems, stories and microtales. Hope you enjoy reading the book and don't forget to share your love and affection for the people in different shades as family, friends etc.

**Sustainable Approaches to Controlling Plant Pathogenic Bacteria** Oct 14 2021 Plant diseases and changes in existing pathogens remain a constant threat to our forests, food, and fiber crops as well as landscape plants. However, many economically important pathosystems are largely unexplored and biologically relevant life stages of familiar systems remain poorly understood. In a multifaceted approach to plant pathogenic behavioral control, Sustainable Approaches to Controlling Plant Pathogenic Bacteria discusses the impact of plant pathogenic bacterial pathogenesis on scientific and economic levels. It introduces mechanisms, measuring tools, and controlling strategies you can use to meet the challenge of developing new and innovative ways to control plant diseases. The book covers many aspects of the activities of pathogenic bacteria that interact with plants. With chapters contributed by experts, the book focuses on: Pathogenesis Epidemiology Forecasting systems Control measures including diagnosis, quarantine, and eradication Adoption of agro-traditional practices Tools for the control of antibacterial polypeptides Nutrient supplements Metabolic substances from other organisms Mechanisms of siderophores Host resistances Quorum sensing and quenching Seed and foliar applications Impact of plant pathogens on scientific and economic levels The editors' approach provides a broad perspective, including modern trends in ecology that consider plant pathogenic bacterial control from all angles. The discussions and reviews in the book cover a wide range of aspects of plant pathogenic bacterial pathogenicity, epidemiology, and impact on the food chain as well as strategies for control, which will help you develop sustainable methods for controlling plant diseases.

**The Pilani Pioneers: Inspiring Success Stories of 25 BITS Pilani Graduates** Apr 07 2021 The Pilani Pioneers profiles twenty-five accomplished BITS Pilani graduates, including startup founders, entrepreneurs and CEOs, who have made an indelible mark on the Indian and global business landscape while deftly navigating the twists and turns of their professional and personal lives. It introduces us to mavericks such as Baba Kalyani, Chairman and Managing Director of Bharat Forge; Hari Menon, Co-founder and CEO of BigBasket; Harish Bhat, Brand Custodian at Tata Sons; Sunil Duggal, Dabur's longest-serving CEO; Tulsi Mirchandaney, MD of Blue Dart Aviation; Nandini Chopra, MD at Alvarez & Marsal; Phanindra Sama, Co-founder of redBus; among others, whose stories of passion and perseverance reveal what it takes to not only achieve success in the competitive arena of business but also make a positive difference in both industry and the world at large. Inspiring, with a touch of nostalgia, this book is an essential read for anyone looking to find their niche and build a meaningful professional life.

*Faces of the Feminine in Ancient, Medieval, and Modern India* Jan 23 2020 This book offers a variety of scholarly studies in the idea, situation, and definition-including the self-definition-of women in India, from the earliest historical period up to the present day. Both in its range of topics and depth of research, this volume creates a sustained focus that is not presently available in the literature of women in India. Faces of the Feminine in Ancient, Medieval, and Modern India comprises 25 essays contributed by a diverse mix of Indian, Canadian, American, and British women scholars, most of whom have lived in South Asia either for all of their lives or for

extended periods. Arranged chronologically, these groundbreaking essays set aside the myths and prejudices that often clutter discussions about women in India. Part I, which is dedicated to the ancient period, defines women's positions as depicted in the sacred law, considers subordinated women in major Hindu epics, describes women's roles in ritual and their understanding of religion, and examines the patriarchal organization of women's lives in Buddhism. Part II begins with an essay on Tantra, a major force in medieval India that influenced both Hinduism and Buddhism and placed women at the center of its sacred rites. Other essays in Part II look at the life and legends of a medieval woman saint poet, the portrayal of a Hindu goddess in medieval Bengal, and the role of women from Mughal harems in decision making. Part III describes the colonial perception of Indian women in the late nineteenth century and shows how women's self-perceptions have been expressed through their art and writing as well as through their political action in the twentieth century. Providing informed and balanced analysis of extensive primary source material, this book will be an essential resource for students of women's lives in India.

*Campus Plus 2022* Aug 31 2020 India, bounded by the majestic Himalayan ranges in the North and edged by an endless stretch of golden beaches, is the land of hoary tradition and cultural diversity. A vivid kaleidoscope of landscapes, glorious historical sites and royal cities, misty mountain hideaways, colourful people, rich civilizations and festivities craft India Incredible. Recent years have witnessed the educational scene, especially the higher education sector in the State undergoing a sea change in respect of quality, diversity and accessibility in tune with the global trends. Kerala's surge in the educational front is to be viewed in the backdrop of the country's great legacy in education. India has been a major seat of learning for thousands of years. The country was home to Takshashila, the first university in the world and Aryabhata, the inventor of the digit Zero. In fact, education in Kerala has now become more value-added and affordable, thanks to the proactive initiatives of the State Government and the active involvement of the private sector. Moreover, in the higher education market, Kerala has a significant edge in respect of cost which means that there would be a growing influx of candidates into the state from outside the state for better and affordable professional education in the days to come. With the most sought-after professionals and an excellent network of institutes, Kerala is becoming the very preferred educational destination in the world. And, we are equipped for you with some elucidations which step-up her significance on the educational map. In Campus Plus, we propose some valuable information along with a number of educational institutes in the State which will be useful for the students and parents in the higher education scenario.

*Island Game of Modern Life* Sep 24 2022 Sukesh, Sanchita, Kapil and Siddhant die and go to Yamlok, where they meet Yamraj. Yamraj gives them one last chance to become alive again, and they can go back to earth, if they win the game: Island Game of Modern Life. The winner will be resurrected to life and could start life from where it ended. What was the game and who wins? What is a modern life? Is it really true that after people die, Yamraj gives one last chance to them to become alive again?

*Compendium of Hydrogen Energy* Nov 26 2022 Compendium of Hydrogen Energy: Hydrogen Production and Purification, the first text in a four-volume series, focuses on the production of hydrogen. As many experts believe that the hydrogen economy will eventually replace the fossil fuel economy as our primary source of energy, the text provides a timely discussion on this interesting topic. The text details the methods of hydrogen production using fossil fuels, also exploring sustainable extraction methods of hydrogen production from water and hydrogen purification processes. Provides a comprehensive understanding of the current methods used in the production of hydrogen Discusses the hydrogen economy and its potential to replace fossil fuels as our primary source of energy Details the methods of hydrogen production using fossil fuels, also exploring sustainable extraction methods of hydrogen production from water and hydrogen purification processes

*Microbial Interventions in Agriculture and Environment* Mar 26 2020 Microbial communities and their multi-functionalities play a crucial role in the management of soil and plant health, and thus help in managing agro-ecology, the environment and agriculture. Microorganisms are key players in N-fixation, nutrient acquisition, carbon sequestration, plant growth promotion, pathogen suppression, induced systemic resistance and tolerance against stresses, and these parameters are used as indicators of improved crop productivity and sustainable soil health. Beneficial belowground microbial interactions in the rhizosphere help plants combat abiotic challenges in the unfavourable environmental conditions of native soils. These microorganisms and their products offer potential solutions for agriculture in problematic areas since they are able to degrade xenobiotic compounds, pesticides and toxic chemicals and help remediate heavy metals in the rhizosphere and so make deteriorated soils suitable for crop production. This book compiles the latest research on the role of microbes in the rhizosphere and agro-ecology, covering interaction mechanisms, microbe-mediated crop production, plant and soil health management, food and nutrition, nutrient recycling, land reclamation, clean water systems, agro-waste management, biodegradation, bioremediation, biomass and bioenergy, sanitation and rural livelihood security. It is a comprehensive reference resource for agricultural activists, policymakers, environmentalists and advisors working for governments, non-governmental organizations and industries, helping them update their knowledge of this important, but often neglected, research area.

**Development and Application of Perfectly Matched Layer for Numerical Boundary Treatment** Feb 24 2020 This master's-level thesis work had focused on the boundary treatments for computational fluid dynamics problems, especially those with unbounded domains. Therefore, it involved a rigorous literature survey on boundary treatment techniques. The primary interest in this effort was on one of the emerging concepts of boundary treatment for numerical schemes, namely the perfectly matched layer (PML) absorbing technique. PML equations were constructed in both Cartesian and generalized coordinate systems to widen its application in uniform and non-uniform grid structures. Throughout the study, Euler equations for perturbation equations linearized about a uniform mean flow were utilized, and flow that is parallel to an axis and flow that is at an arbitrary direction were considered. The PML formulation was validated and PML cases were simulated for a combination of absorbing coefficients and layer thickness in order to find the optimum performance of the technique. The results were analyzed, and the issues were documented. Furthermore, PML equations were constructed by splitting the velocity into three components. Discussion is provided on the need for a proper spacetime transformation, based on the literature study.

**Handbook of Research on Advanced Data Mining Techniques and Applications for Business Intelligence** Aug 24 2022 The development of business intelligence has enhanced the visualization of data to inform and facilitate business management and strategizing. By implementing effective data-driven techniques, this allows for advance reporting tools to cater to company-specific issues and challenges. The Handbook of Research on Advanced Data Mining Techniques and Applications for Business Intelligence is a key resource on the latest advancements in business applications and the use of mining software solutions to achieve optimal decision-making and risk management results. Highlighting innovative studies on data warehousing, business activity monitoring, and text mining, this publication is an ideal reference source for research scholars, management faculty, and practitioners.

**Bioorganic Phase in Natural Food: An Overview** Jan 17 2022 The focus of this singular work is to discuss the role and importance of bioorganic phase in food products-providing the first major reference source for researchers looking to understand all aspects of the isolation, extraction and application of this major element in natural foods. From the identifying features to its applications through biotechnology and nanobiotechnology, this book covers all of the important aspects of bioorganic phase and points to future uses and methods. With chapters focusing on phase extraction and application, food product synthesis and nanoparticle application, Bioorganic Phase in Natural Food: An Overview covers both conventional and non-conventional approaches for the extraction of bioorganic phase from various food sources. Toxicity studies in nanoparticles are presented, and the vital role played by bioorganic phase toward nanoparticles synthesis is outlined in full. For any researcher looking for complete coverage of all main aspects of bioorganic phase in foods, this work provides a comprehensive and well-researched view of this important subject. .
