Never Mind the Laptops Jan 13 2021 "What we all hope for our children's education is undiminished curiosity and creativeness, and solid practical preparation for adult work. Today, there's no doubt that easy access to computers is vital for students. Bob Johnstone has brilliantly and passionately told the story of the worldwide struggle to make today's equivalent of the pencil accessible to all students." -Victor K. McElheny, author of "Watson and DNA" If every kid had a laptop computer, what would difference would it make to their learning? And to their prospects? Today, these are questions that all parents, teachers, school administrators, and politicians must ask themselves. Bob Johnstone provides a definitive answer to the conundrum of computers in the classroom. His conclusion: we owe it to our kids to educate them in the medium of their time. In this book he tells the extraordinary story of the world's first laptop school. How daring educators at an independent girls' school in Melbourne, Australia, empowered their students by making laptops mandatory. And how they solved all the obstacles to laptop learning, including teacher training. Their example spread to thousands of other schools worldwide. Especially in America, where it inspired the largest educational technology initiative in US history—the State of Maine issuing laptops to every seventh-grader in its public school system. This lively, intriguing, anecdote-rich account is based on hundreds of interviews. In it, you'll meet the visionary leaders, inspirational principals, heroic teachers, and their endlessly-surprising students who showed what computers in the classroom are really for.

Survey of Academic Library Plans for Laptops and Other Mobile Computing Jul 31 2022 Academic libraries have vastly increased their stock of laptops and other mobile computing devices during the pandemic. Does this represent a fundamental shift in computer use in academic libraries, or merely a temporary shift? This study helps answer this question as well as many others. Such as: What is the stock of laptops maintained by academic libraries? How fast has it grown in recent years? What are the plans for the future? Which brands and capabilities are most favored? What is the stock of tablets and how fast has it grown? What about smartphones, wearable computing and other mobile technology - do they have a role in the library? How much are libraries spending on mobile computing and what are their plans for the future? In addition to the data on numbers and spending on various forms of mobile computing, the report looks at the impact on workstation use and deployment, as well as the terms and conditions for lending out mobile computing to students? How long are the typical lending periods? What is the replacement cycle for laptops? What kind of mobile computing technology is issued to library staff. Just a few of the findings from this comprehensive 80-page report are that: Colleges with fewer than 2000 students provided a mean of 17.75 laptops in the library. The increase in laptop provision in 2021 was much higher for public than private colleges. For private colleges, 69.33% of laptop loans made by libraries to patrons were for one day or less. For community colleges, a mean of 39.88% of staff had a library issued laptop. Community college libraries purchased more tablets than did any other type of college library. For 28.57% of research universities sampled, the replacement cycle for laptops was 3 years. Data in the report was provided by 46 colleges and universities; data is broken out by size and type of college, by tuition level, and for public and private colleges.
