The Use of Six-Minute Solution Passages to Increase Reading Fluency

Jan 26 2023 The purpose of this study was to examine the effectiveness of the Six-Minute Solution program for reading fluency. Three pairs of fourth grade students were chosen for this intervention during a four week time period. The pairs of students came from various levels of reading fluency. In the pairs of students, one student read the Six-Minute Solution passages while the other partner helped track the first student's progress. The intervention lasted approximately six minutes a day, five days a week. Participants were audio recorded when necessary and the progress was monitored weekly using AIMSweb fluency probes (Reading Curriculum-Based Measurement). The participants were compared to the nationally normed average for rate of improvement according to AIMSweb. The

conclusion was that the program helped build confidence, improved reading fluency, and created the determination to read more throughout the day to continue progress.

Drawdown May 26 2020 •
New York Times bestseller •
The 100 most substantive
solutions to reverse global
warming, based on meticulous
research by leading scientists
and policymakers around the
world "At this point in time, the
Drawdown book is exactly what
is needed; a credible,
conservative solution-by-
solution narrative that we can
do it. Reading it is an effective

inoculation against the
widespread perception of doom
that humanity cannot and will
not solve the climate crisis.
Reported by-effects include
increased determination and a
sense of grounded hope." —Per
Espen Stoknes, Author, *What
We Think About When We Try
Not To Think About Global
Warming* "There's been no real
way for ordinary people to get
an understanding of what they
can do and what impact it can
have. There remains no single,
comprehensive, reliable
compendium of carbon-
reduction solutions across
sectors. At least until now. . . .
The public is hungry for this
kind of practical wisdom."
—David Roberts, *Vox* "This is
the ideal environmental
sciences textbook—only it is
too interesting and inspiring to
be called a textbook." —Peter
Kareiva, Director of the
Institute of the Environment
and Sustainability, UCLA In the
face of widespread fear and
apathy, an international
coalition of researchers,
professionals, and scientists
have come together to offer a

set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

The Challenger Sale Feb 21 2020 What's the secret to sales success? If you're like most business leaders, you'd say it's fundamentally about relationships-and you'd be wrong. The best salespeople don't just build relationships with customers. They challenge them. The need to understand what top-performing reps are doing that their average performing colleagues are not drove Matthew Dixon, Brent Adamson, and their colleagues at Corporate Executive Board to investigate the skills, behaviors, knowledge, and attitudes that matter most for high performance. And what they discovered may be the biggest shock to conventional

sales wisdom in decades. Based on an exhaustive study of thousands of sales reps across multiple industries and geographies, The Challenger Sale argues that classic relationship building is a losing approach, especially when it comes to selling complex, large-scale business-to-business solutions. The authors' study found that every sales rep in the world falls into one of five distinct profiles, and while all of these types of reps can deliver average sales performance, only one-the Challenger- delivers consistently high performance. Instead of bludgeoning customers with endless facts and features about their company and products, Challengers approach customers with unique insights about how they can save or make money. They tailor their sales message to the customer's specific needs and objectives. Rather than acquiescing to the customer's every demand or objection, they are assertive, pushing back when necessary and

taking control of the sale. The things that make Challengers unique are replicable and teachable to the average sales rep. Once you understand how to identify the Challengers in your organization, you can model their approach and embed it throughout your sales force. The authors explain how almost any average-performing rep, once equipped with the right tools, can successfully reframe customers' expectations and deliver a distinctive purchase experience that drives higher levels of customer loyalty and, ultimately, greater growth.

The Effects of Using the Six Minute Solution -- a Reading Fluency Program on Third Grade Fluency and

Comprehension Sep 22 2022

The purpose of the study was to determine whether the use of daily repeated reading practice through the use of the Six Minute Solution Reading

Fluency Program would improve reading fluency and as a result increase reading comprehension of third grade students. This study used a pretest/posttest design in a third grade classroom during the fall trimester of the 2009-2010 school year. Pretests were given to determine the individual student's reading level, their fluency rate, and their comprehension level. The students participated in a daily six minute routine which included repeated reading of passages in order to improve their fluency rate. Students graphed their scores daily. Assessments were done regularly to determine whether students needed to be regrouped. The data and results showed an increase in reading fluency as well as comprehension in the majority of students, thus supporting the purpose of this study.
