Global Justice and International Economic Law Dec 10 2020 Since the beginnings of the GATT and the Bretton Woods institutions, and on to the creation of the WTO, states have continued to develop institutions and legal infrastructure to promote global interdependence. International lawyers are experts in understanding how these institutions operate in practice, but they tend to uncritically accept comparative advantage as the principal normative criterion to justify these institutions. In contrast, moral and political philosophers have developed accounts of global justice, but these accounts have had relatively little influence on international legal scholarship and on institutional design. This volume reflects the results of a symposium held at Tillar House, the American Society of International Law headquarters in Washington, DC, in November 2008, which brought together philosophers, legal scholars and economists to discuss the problems of understanding international economic law from the standpoints of rights and justice, in particular from the standpoint of distributive justice.

She's more determined than ever to get involved and put her law degree to good use, but Sin soon finds himself riding to the rescue. Because he'll kill anybody who touches a hair on Faye's head—if she doesn't get to them first. One way or another, tonight's going to be someone's last ride....
