The Anthropocene Oct 08 2020 The Anthropocene is a concept which challenges the foundations of humanities scholarship as it is traditionally understood. It calls not only for closer engagement with the natural sciences but also for a synthetic approach bringing together insights from the various subdisciplines in the humanities and social sciences which have addressed themselves to ecological questions in the past. This book is an introduction to, and structured survey of, the attempts that have been made to take the measure of the Anthropocene, and explores some of the paradigmatic problems which it raises. The difficulties of an introduction to the Anthropocene lie not only in the disciplinary breadth of the subject, but also in the rapid pace at which the surrounding debates have been, and still are, unfolding. This introduction proposes a conceptual map which, however provisionally, charts these ongoing discussions across a variety of scientific and humanistic disciplines. This book will be essential reading for students and researchers in the environmental humanities, particularly in literary and cultural studies, history, philosophy, and environmental studies.

Implementing Online Union Lists of Serials Jun 03 2020 This book, first published in 1989, is a comprehensive look at PaULS, the Pennsylvania Union List of Serials. The editors, both of whom have extensive experience with online union listing, have collected the previously published articles recording the development and implementation of PaULS; compiled new articles representing updated perspectives; provided the PaULS procedure manual; and included an annotated bibliography of literature about online union listing. Contributors to this fascinating volume describe extensive union listing activities of West Virginia University, a special library, Calgon Corporation, and a regional consortia, the Lehigh Valley Association of Independent Colleges.

The Answers Lie Within Us Apr 01 2020 Breaking new ground by suggesting a radical alternative to religion, this book offers a scientific and humanist alternative to religion which appeals to people's critical faculties rather than emotions or intuitions. It suggests that religion, in its usual sense, can be replaced by something better, that the human spirit or subjectivity can be the subject of scientific study and that lack of purpose or design in the universe is not a handicap but a positive opportunity for intelligent beings to make of the universe and its contents what they reasonably can.

Usability Evaluation of Online Learning Programs Nov 20 2021 Successful use of information and communication technologies depends on usable designs that do not require expensive training, accommodate the needs of diverse users and are low cost. There is a growing demand and increasing pressure for adopting innovative approaches to the design and delivery of education, hence, the use of online learning (also called E-learning) as a mode of study. This is partly due to the increasing number of learners and the limited resources available to meet a wide range of various needs, backgrounds,

expectations, skills, levels, ages, abilities and disabilities. The advances of new technology and communications (WWW, Human Computer Interaction and Multimedia) have made it possible to reach out to a bigger audience around the globe. By focusing on the issues that have impact on the usability of online learning programs and their implementation, *Usability Evaluation of Online Learning Programs* specifically fills-in a gap in this area, which is particularly invaluable to practitioners.

Handbook of Public Protection Jul 05 2020 Public protection has become an increasingly central theme in the work of the criminal justice agencies in many parts of the world in recent years. Its high public profile and consequent political sensitivity means that growing numbers of criminal justice professionals find their daily work load dominated by the assessment and management of high risk of harm offenders. Developments such as sex offender registers and (in the UK) Multi Agency Public Protection Arrangements (Mappa) have made this issue not only a core activity for police, probation and prison services, but to a range of other organizations as well, in particular social work and the health services. Partnership has become central to the concept of public protection. At the same time the concept of public protection has occasioned increased political debate. Protecting the public from high risk or dangerous offenders has become an international issue and has increasingly shaped criminal justice policy. This text brings together leading authorities in the field, providing authoritative coverage of the theory and practice of public protection, both in the UK and internationally. It provides a critical review of contemporary public protection practice as well as up-to-date research and thinking in the field.

Blockchain Jan 03 2023 Blockchain: A Hype or a Hoax? fills a gap in the book market to provide material

that is not only technical but also caters to business readers. This book was written to keep in mind various stakeholders and the current gap in blockchain education as well as use case implementation. This book reviews blockchain technology, discusses why proof of concept fails, offers examples of use cases that have been successful and that have failed and articulates a framework that should be used before deciding whether blockchain is the right technology for transformation. It uses strategic models and frameworks to assist organisations to see a fit score for their specific use cases. This book provides guidance on how to create a blockchain strategy and a business case to pitch for the budget. It also includes a case study to apply the knowledge on practical use cases for blockchain and a technical overview of most of the blockchain use cases in the market including crypto, non-fungible tokens, decentralised finance, and decentralised autonomous organisations, as well as financial and non-financial industry use cases. This book also provides a detailed overview of most of the mainstream blockchain products currently available in the market. It also offers guidance on how readers can best educate themselves on blockchain technology that is available through commercial and free resources. It concludes with a clear direction on selecting blockchain to solve real-life use cases that are best fit. A financial and non-financial value-adding framework is discussed throughout this book to assist business leaders, programme managers, product managers and information technology leaders to make strategic choices, and business cases and develop strategies for digital transformation through the use of blockchain. The distinctive feature of this book is the critical analysis of blockchain from a technology and business perspective. This is the first book to focus on business, technology and blockchain selection framework. The most unique feature of this book would be to apply Michael Porter's competitive advantage strategy theory on blockchain use cases and their impact on companies. This book is aimed at technology students, technology professionals, blockchain and fintech consultant and business leaders. It will also be useful for readers who are building a business case to adopt blockchain into an organisation or are seeking to grow their knowledge of blockchain and improve their fintech strategy.

Machine Learning, Multi Agent And Cyber Physical Systems - Proceedings Of The 15th International Flins Conference (Flins 2022) Jan 23 2022 FLINS, an acronym originally for Fuzzy Logic and Intelligent Technologies in Nuclear Science, was inaugurated by Prof. Da Ruan of the Belgian Nuclear Research Center (SCK-CEN) in 1994 with the purpose of providing PhD and Postdoc researchers with a platform to present their research ideas in fuzzy logic and artificial intelligence. For more than 28 years, FLINS has been expanded to include research in both theoretical and practical development of computational intelligent systems. With this successful conference series: FLINS1994 and FLINS1996 in Mol, FLINS1998 in Antwerp, FLINS2000 in Bruges, FLINS2002 in Gent, FLINS2004 in Blankenberge, FLINS2006 in Genova, FLINS2008 in Marid, FLINS2010 in Chengdu, FLINS2012 in Istanbul, FLINS2014 in Juan Pesoa, FLINS2016 in Roubaix, FLINS2018 in Belfast and FLINS2020 in Cologne, FLINS2022 was organized by Nankai University, and co-organized by Southwest Jiaotong University, University of Technology Sydney and Ecole Nationale Supérieure des Arts et Industries Textiles of University of Lille. This unique international research collaboration has provided researchers with a platform to share and exchange ideas on state-of-art development in machine learning, multi agent and cyber physical systems. Following the wishes of Prof. Da Ruan, FLINS2022 offered an international platform that brought together mathematicians, computer scientists, and engineers who are actively involved in machine learning, intelligent systems, data analysis, knowledge engineering and their applications, to share their latest innovations and developments, exchange notes on the state-of-the-art research ideas, especially in the areas of industrial microgrids, intelligent wearable systems, sustainable development, logistics, supply chain and production optimization, evaluation systems and performance analysis, as well as risk and security management, that have now become part and parcel of Fuzzy Logic and Intelligent Technologies in Nuclear Science. This FLINS2022 Proceedings has selected 78 conference papers that cover the following seven areas of interests:

Research Handbook on the Law and Politics of Migration Mar 13 2021 As the law and politics of migration

become increasingly intertwined, this thought-provoking Research Handbook addresses the challenge of analysing their growing relationship. Discussing the evolving theoretical approaches to migration, it explores the growing attention given to the legal frameworks for migration and the expansion of regulation, as migration moves to the centre of the political global agenda. The Research Handbook demonstrates that the overlap between law and politics puts the rule of law at risk in matters of migration.

Online Education Nov 01 2022 In "Online Education: Global Questions, Local Answers", 24 college educators focus on the most important questions to be addressed by all scholar-teachers and administrators committed to developing high-quality online education programs. We describe these questions as "global" because they transcend the particular situations of individual institutions. They are questions that everyone involved in online education needs to address: What are the issues to consider when first developing and then sustaining an online education program? How do we create interactive, pedagogically sound online courses and classroom communities? How should we monitor and assess the quality of online courses and programs? And how should recent developments and innovations in online education cause us to reexamine our roles and responsibilities as educators in technical communication? While these global questions affect all of us in one way or another, they demand different local answers, such as those presented by the contributors to this text. Readers will need to consider which of these local answers might apply to their own situations and how these answers might need to be adapted to reflect the particular needs of their own institutions.

Becoming a Physical Education Teacher Oct 20 2021 Teaching physical education is a challenging but rewarding occupation. Finding a way into the profession can be a daunting task while regular changes in

government policy can make it hard to stay up to date. This engaging new book explains the process of becoming and being a teacher of secondary school physical education, from the various routes of entry into the profession, to the realities of being a qualified PE teacher, to the ways in which experienced teachers can become teacher educators and nurture the next generation. It combines rich personal accounts of teaching in, and being taught, physical education, with practical advice for trainees, newly qualified teachers and established professionals, with an emphasis throughout on the importance of critical self-reflection. The book begins by exploring the nature and purpose of physical education and examining the historical development of initial teacher training. It examines recent changes in training, policy and curriculum, and offers an overview of the various ways of becoming a PE teacher, including the Post Graduate Certificate in Education (PGCE) and school and employment based routes. The book offers advice on what to expect at interview, meeting the standards for qualifying to teach, and on how to survive the difficult first year as a newly-qualified teacher. It also outlines the challenges and rewards of being a qualified teacher, mentor or curriculum leader, as well as a teacher educator within higher education. Concise, helpful, and filled with sensible insights based on real experiences of teaching physical education, *Becoming a Physical Education Teacher* is an essential read for anybody considering entering the profession, or for students, trainees, newly qualified or experienced teachers wanting to understand better the process of becoming, and being, a successful PE teacher.

Why Won't They Listen? May 07 2023 A lot of time and money is spent by Christians who have a passion to spread the gospel. Across the globe, this effort is paying off as seekers find Christ, the source of truth and peace. In many cultures, though, appeals made on behalf of the Christian faith are met with blank stares, indifference, even mocking hostility. Ken Ham, one of Christendom's most astute observers of evangelism, is convinced that compromise with evolutionary world views has virtually crippled preaching and teaching efforts, especially in Western societies. In this truly bold book, Ham presents an ambitious plan to fulfill the Great Commission. A compelling writer and speaker, Ham deftly exposes the great flaws of Darwinism, and shows how compromise with this philosophy of death is killing the Church. By the jungle of tangled views of reality, and helps committed Christians see the path to effective evangelism.

Delivering an Elusive Dream of Democracy Jun 27 2022 This book analyses the decline of the ANC in Nelson Mandela Bay, the economic hub of the Eastern Cape, also known as the party's heartland. Over the course of last twenty-four years, party dominant dilemmas have plagued the ANC in the Nelson Mandela Bay. This includes corruption, political factionalism, blurring the line between party and state, as well as engaging in spoils politics. While this metro had encapsulated the 'Dream of '94' since the inception of democracy in South Africa, weak quality of governance, lack of political efficacy, and mediocre, if not anorexic, service delivery effectively led to the ANC losing this symbolically important metropolitan municipality. With the loss of Nelson Mandela Bay, voters effectively demonstrated that they are no longer willing to accept the liberation narrative and elusive promise of a better tomorrow. The ANC can no longer rely on the political capital of the liberation struggle in securing and maintaining its electorally dominant position. The loss of Nelson Mandela Bay, coupled with Johannesburg and Tshwane, could potentially signal the end of ANC electoral dominance. The author tracks the electoral decline of the ANC and analyses the dynamics that impact on its ability to potentially sustain its political and electoral dominant position in future elections.

Professional Development in Online Teaching and Learning in Technical Communication May 15 2021 Technical communication instructors need professional development opportunities that will aid them in creating their online courses; in developing curricula; and in teaching in what may be a new environment. Although instructors can turn to instructional design teams for assistance in using Learning Management System and its functions, they specifically need their own first-hand, immersive learning within their pedagogical training. In other words, teachers need to learn in an online context like the environment that their students will use; such direct training helps instructors to facilitate student learning in a technologically distributed classroom. Beyond learning technological skills to facilitate a course, these teachers need to learn to use the technology effectively to keep students on track and to teach them skills and material. This collection—which includes three contributions from 2007 and 10 from 2017—focuses on the types of professional development instructors need to be successful in the online technical

communication classroom. Formed as a 10-year retrospective of the field and its advances in online education professional development, the book offers instructors theoretical and practical suggestions for creating and teaching successful online courses and managing entire online technical communication programs. This book was originally published as a special issue of *Technical Communication Quarterly* (TCQ).
