The manual is intended to give the reader some useful digital computer programs and hints that will enable and encourage him to use the computer more effectively for solving many of his assigned homework problems. The manual can also be of use in a student's pursuit in doing his thesis. Psychology Graduate School: A User's Manual is an enjoyable description of what being a graduate student in clinical, counseling, or school psychology programs is really like. For use on its own or with the Test of Integrated Language and Literacy Skills(TM) (TILLS™), the Student Language Scale reliably screens students from ages 6-18 years for language and literacy disorders, including dyslexia. Filled out by parents, teachers, and students in just three minutes or less, the 12-question screener is a quick, cost-effective way to see how students are performing on academic tasks as compared to their same-age peers. This concise User's Manual shows you how to effectively use the SLS to: Screen for language/literacy disorders by gathering teachers' and parents' ratings of students. When teachers or parents rate more than two areas on items 1-8 less than 5, SLS results indicate the student is at risk and needs further assessment Gather input about a struggling student's strengths and needs from multiple sources--a key requirement of IDEA Enhance home-school communication by gaining new insight into the student's performance and the teacher's, parents', and student's perspectives on it, whether or not everyone agrees and whether or not there are concerns You'll get reader-friendly guidance on how to administer the SLS with teachers, parents, and students; a complete guide to the technical data supporting the SLS; and three examples that show how the SLS can help you make sound decisions about followup for students who need it. Whether used with an entire classroom or with individual students, the SLS is the tool you need to quickly gather valuable information about strengths and needs--and plan next steps for students at risk for disorders. Ideal for use with TILLS Give the SLS to a whole class--and when results indicate the student is at risk, follow up with TILLS assessment. Strong sensitivity and specificity Sensitivity of the SLS to risk of language/literacy disorder is .90 for teachers and .85 for parents, and specificity (correct identification of typical learners) is .90 for teachers and .83 for parents.
