**Analysis of Contingent Versus Permanent Employees in the Healthcare Industry** Mar 26 2020 This thesis is designed to take a deep look into two types of staffing models found in the healthcare industry. A qualitative study is used to explore strengths and weaknesses of permanent and contingent workforce solutions. The problem statement is focused on determining the workforce solution method that is most successful for healthcare organizations. The issue was evaluated and analyzed through the examination of peer-reviewed literature, as well as healthcare organizations that have experienced positive outcomes from contingent or permanent staffing solutions. The final recommendation, derived from research conclusions, encourages healthcare organizations to incorporate a hybrid model of temporary and permanent clinicians. This solution results in meeting the expectation of delivering quality healthcare to all communities. The outcomes of the hybrid model doesl [sic] provide health systems with optimal staffing sustainability, and cost efficiency.

**Putting Skill to Work** Jan 23 2020 An argument for reimagining skill in a way that can extend economic opportunity to workers at the bottom of the labor market. America has a jobs problem--not enough well-paying jobs to go around and not enough clear pathways leading to them. Skill development is critical for addressing this employment crisis, but there are many unresolved questions about who has skill, how it is attained, and whose responsibility it is to build skills over time. In this book, Nichola Lowe tells the stories of pioneering workforce intermediaries--nonprofits, unions, community colleges--that harness this ambiguity around skill to extend economic opportunity to workers at the bottom of the labor market.

**The A+ Solution** Mar 07 2021 Millions of Americans remain unemployed, but on average three million jobs go unfilled because employers cannot find workers with the skills and experience they need. In addition, over 800,000 people aren't counted in monthly unemployment reports because they have given up looking for jobs. Addressing the skills gap and getting people back to work through workforce development programs is – and has long been – a national priority. Yet far too frequently, current efforts fail for multiple reasons – from inconsistent funding and one-shot training programs to an over-reliance on local programs to solve a national problem. Professional associations are on standby and ready to train, educate, and motivate workers across career fields and industries to take charge of their own careers. The A+ Solution makes the case for how and why 70,000 professional societies and trade associations are perfectly positioned to train and support our workforce with proven expertise at minimal cost. From industry-based expertise and knowledge communities to certifications and continuing education programs, associations offer unparalleled resources to provide individuals and employers with long-term training solutions.

Yet, current legislation limits associations from active participation in workforce training at the state and local level. The A + Solution provides a compelling argument for what associations offer – and the changes needed to take wider advantage of their programs and services.

**Skills to Pay the Bills** Jul 31 2020 According to the National Collaborative Workforce and Disability for Youth (NCWD/Youth), the development of soft skills is identified as a critical component for success in activities such as civic participation and youth leadership in addition to school- and work-based learning experiences. Companies have identified the following competencies as key to success of young workers: Communication; Networking; Enthusiasm and Attitude; Teamwork; Problem Solving and Critical Thinking; Professionalism. Activities that can be found in this publication were created to provide an introduction to the "basics" of soft skills. These materials have been designed with youth service professionals in mind -specifically those working with in-school and out-of school youth, ages 14-21, on career and workforce readiness skills. Many of the exercises within this resource offer timed activities with directions for specific-workplace scenarios. Some of these activities include several interview role-play situations, plus lessons about a resilient attitude and understanding directions, to networking, plus social media, and email etiquette tips for professional work settings. With each activity, the text allows for extension activities, and journaling activities which are elements of common core principles taught in America's public school system today. Some of the exercises also present follow-up questions with spaces provided for answers as part of hands-on learning lessons. These activities can be used by a facilitator within a school's career and technology center, or a faith-based career search program, and by youth ages, 14-21 that are eager to find a paid position. Talent Management Systems Jan 17 2022 Talent Management Systems addresses the transformation Web-based technologies have brought to workforce acquisition and management. It examines proven and leading-edge best practices, and what tactics and strategies organizations should employ to remain competitive in this arena. The book is part practical, offering advice on how to institute best practices in e-recruitment and talent management, and strategic, discussing trends and state of the art technology and practices that should be adopted or avoided. "We're at the brink of the next global battle in the war for talent, and companies with a firm grasp on today's technologies, and the best view over the horizon, are positioned to win. No one understands the intersection of talent and technology better than Allan Schweyer and, as this book demonstrates, no one tells us the story as clearly as he. This is an essential read and an important work in the now-critical discipline of human capital management." —Michael Foster, CEO, AIRS, and Author of *Recruiting on the Web* "Allan Schweyer has been on the leading edge of recruitment technology since the dawn of the Internet. In many ways the Internet has created more confusion than solutions for the world of recruiting and talent management. It has certainly made things more complex. HR professionals and even company presidents have become desperate for clarity on the future of talent management—Allan Schweyer's book provides that clarity and establishes him as the authority on web-based hiring and talent management. No major implementation decision should be made without this invaluable guide." —Graham Donald, President, Brainstorm Consulting "Talent management has suddenly gone from being a nice idea to a core business function. No one knows more about this new function, and the technologies that make it possible, than Allan Schweyer." —David Creelman, Senior Contributing Editor, HR.com, and Independent Human Capital Analyst "Once again, Schweyer has produced the best writing in North America on this subject, which I've covered for fifteen years." —Bill Kutik, Technology Columnist, Human Resource Executive "As corporate executives quickly come to the shocking realization that the global workforce—and how that talent is managed and developed both locally and globally—will almost unilaterally determine their future success in global markets, few workforce experts have bothered to provide business leaders with a useful compass and map for the next chapter of workforce management. Mr. Schweyer generously and eloquently provides the talent compass and workforce map for the first pragmatic steps of the new global journey." —John Chaisson, CEO, Global Workforce Solutions

**Managing the Aging Workforce** Feb 24 2020 Managing the Aging Workforce is one of the crucial topics for many of the world's enterprises. The increasing average age of populations does not only affect social systems, countries and communities, but also has a strong impact on the work of businesses and companies. The decline in demographic fitness will not only hit countries like the U.S., the Western European countries, or Japan, but also the upcoming societies in China or in the Eastern European countries. In many of these countries, during three or four decades the average age will grow from about 40 years now to about 50 years. Where experts are needed, this may result in an increase of the workforce's age of between 5 and 10 years in only one decade. For companies thus, a number of challenges arise that have to be overcome fast and continuously. The main topics in this field will be new strategies in leadership, new concepts in health management, new ways in knowledge management and learning, as well as new models how to drive ideas for diversity and innovation. On the one hand, enterprises therefore will have to invest in their aging employees for supporting their talents, helping them to learn and keeping them in the company. On the other, they will have to increase productivity, keep on searching for new products, and integrate experts from abroad. This has to be combined with new ways of strategies and HR management. This book presents an analysis of the present and upcoming situation, and an introduction into the strategic concepts enterprises will need to survive in aging societies.

**Community College Leaders on Workforce Development** Jan 05 2021 This book has two things going for it that are rarely combined—it is fundamentally purposeful and it is useful. As the authors point out, there is a trilogy of needs confronting any business leader with a change agenda and/or transitioning into a new top role: influence, coalition building, and performance consulting. Of the three, performance consulting has received the least amount of attention in both the public and private-sector businesses. Because the focus on performance consulting rests primarily on the worker and the workplace environment, the authors contend that we must have a picture of how that environment has changed over the years. In this book, visionary leaders of community colleges will present their views about the present challenges and future approaches needed for community colleges to be successful.

**Growing Fairly** Apr 07 2021 Tested, practical ideas to meet current and future skilling needs of both workers and employers The labor market in the United States faces seemingly contradictory challenges: Many employers have trouble finding qualified applicants for current and future jobs, while millions of Americans are out of work or are underemployed—their paths to living-wage jobs blocked by systemic barriers or lack of adequate skills. *Growing Fairly* offers workforce development reforms that meet the needs of both workers and employers. Based on the experiences of hundreds of leaders and workers, the authors set out ten principles for designing a more effective and equitable system that helps workers obtain the skills necessary for economic mobility. The principles outlined in the book argue for a more comprehensive view of the skilling needs of current and prospective workers. They spell out the attributes of effective programs and make the case for skill-based hiring, widely distributed performance data, and collaboration. The book emphasizes the importance of local action to overcome the structural barriers that challenge even the most determined would-be learners. *Growing Fairly* shows cross sector leaders how to work across organizational boundaries to change the trajectory of individuals struggling to make a living wage. This is not a book of untested theories. Instead, it is written by practitioners for practitioners. Much of it is told through the voices of those who run programs and people who have taken advantage of them. While the issues the book addresses are profound, its take on the subject is optimistic. Between them, the authors have spent decades searching out and supporting effective practices. Even more critically, they have learned how to knit competing agencies and organizations into cohesive systems with coordinated missions. Their practical ideas will benefit a wide range of readers, from practitioners in the field to students and scholars of the American labor system.
